Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I see the highlighted note in step A11 for triggering an NA. Is this something I need to do prior to the test? If not, I am ready for the CSOR.

Siri

The removal of the W40 withdrawal was working as designed, although I made a fix that does not directly impact the test. I have removed the U09 action and am ready to move on to A09.

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

Siri

The U09 conviction has been removed as well as the W40 withdrawal. However, the AI U09 withdrawal was not removed.

This will require a fix so I do not anticipate being able to do any further tests before you leave today.

Yes, if you have an additional withdrawal for A08, there will be 3 linkages and the effective date for the A08 can be same as W40 and it'll be effective for 1 year from the date you choose.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, A4 sent (A08 withdrawal was sent with an underlying A08 conviction). We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Ok, I sent A3 and noticed the following:

The conviction ID for the U09 is blank on the H3 message.

The withdrawal for the U09 is not present on H5 message. Sorry, I forgot to mention in previous email that as U09 (a major offense) was sent on the ROOSC, we expect at least 1 year withdrawal from AI, for the reported U09 and this withdrawal will be linked to the underlying conviction.

Thank you,
Siri.

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

This email comes from an external source, so remember, Think Before You Click!
On the SB I sent, noticed the following:

H3 message:

Received the following error on H3 message: 'INVALID ACD CONVICTION CODE '

Looks like we have a W40, instead of a U09 on H3

H5 message:

The jurisdiction code withdrawing is AK, instead of AI for the U09.

H7 message:

Document ID: 0.7.1187.89519 DMV00035114

The W40 is not linked correctly, (as there are no convictions with conviction Id, 01 and 02.)

Could you please take a look?

Thank you,
Siri.

Gary,

I just tried A1 now, the permit status and permit restriction look good. We can run the test cases now, but in case you make any changes for AKA DOB, we will need to run them again.

Also, I noticed that today the HC had 1 AKA DOB on the HC message and also the AKA Name count is 05, instead of 03. Could you please take a look at that?

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Siri,

I will need to make a fix for the permit status. To clarify, this is HC parameter DDLPST, correct?

There are restrictions on the permit, including P. So H6 will also need to be fixed. Hopefully I will be ready for a retest before you need to leave today.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, I sent A3 and noticed the following:

The conviction ID for the U09 is blank on the H3 message.

The withdrawal for the U09 is not present on H5 message. Sorry, I forgot to mention in previous email that as U09 (a major offense) was sent on the ROOSC, we expect at least 1 year withdrawal from AI, for the reported U09 and this withdrawal will be linked to the underlying conviction.

Thank you,
Siri.

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

This email comes from an external source, so remember, Think Before You Click!
On the SB I sent, noticed the following:

H3 message:

Received the following error on H3 message: 'INVALID ACD CONVICTION CODE '

Looks like we have a W40, instead of a U09 on H3

H5 message:

The jurisdiction code withdrawing is AK, instead of AI for the U09.

H7 message:

Document ID: 0.7.1187.59074 DMV00035133

The W40 is not linked correctly, (as there are no convictions with conviction Id, 01 and 02.)

Could you please take a look?

Thank you,
Siri.

Ok, the A08 withdrawal was sent with an underlying A08 conviction. We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

Siri

The removal of the W40 withdrawal was working as designed, although I made a fix that does not directly impact the test. I have removed the U09 action and am ready to move on to A09.

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, A4 sent (A08 withdrawal was sent with an underlying A08 conviction). We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

Gary,

I just tried A1 now, the permit status and permit restriction look good. We can run the test cases now, but in case you make any changes for AKA DOB, we will need to run them again.

Also, I noticed that today the HC had 1 AKA DOB on the HC message and also the AKA Name count is 05, instead of 03. Could you please take a look at that?

GMSCNM	MESSAGE AKA NAME COUNT	1	5	
GMSCSS	MESSAGE AKA SSN COUNT	1	0

Siri, I made the fix to HC permit status and the H6 restriction codes.

I will investigate the ability to maintain alias DOB in the system along with the alias names. I am ready if you want to run A1 again unless you'd rather wait until the DOB issue is addressed.

Thanks
Gary

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Siri,

I will need to make a fix for the permit status. To clarify, this is HC parameter DDLPST, correct?

There are restrictions on the permit, including P. So H6 will also need to be fixed. Hopefully I will be ready for a retest before you need to leave today.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Thanks Siri,

I will investigate/fix the max permit endorsements as well as the license status. Just to clarify, even though the CDL is suspended per the withdrawal, you still expect both the comm and non-comm status to be LIC?

Regarding aliases, we only implement the name alias. If it is necessary to include DOB alias, let me know and I can discuss further with Mina.

thanks

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, A4 sent (A08 withdrawal was sent with an underlying A08 conviction). We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,

Siri.

Ok, I sent A3 and noticed the following:

The conviction ID for the U09 is blank on the H3 message.

The withdrawal for the U09 is not present on H5 message. Sorry, I forgot to mention in previous email that as U09 (a major offense) was sent on the ROOSC, we expect at least 1 year withdrawal from AI, for the reported U09 and this withdrawal will be linked to the underlying conviction.

Thank you,
Siri.

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

On the SB I sent, noticed the following:

H3 message:

Received the following error on H3 message: 'INVALID ACD CONVICTION CODE '

Looks like we have a W40, instead of a U09 on H3

H5 message:

The jurisdiction code withdrawing is AK, instead of AI for the U09.

H7 message:

The W40 is not linked correctly, (as there are no convictions with conviction Id, 01 and 02.)

Could you please take a look?

Thank you,
Siri.

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

I see the highlighted note in step A11 for triggering an NA. Is this something I need to do prior to the test? If not, I am ready for the CSOR.

Siri

The removal of the W40 withdrawal was working as designed, although I made a fix that does not directly impact the test. I have removed the U09 action and am ready to move on to A09.

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

Siri

The U09 conviction has been removed as well as the W40 withdrawal. However, the AI U09 withdrawal was not removed.

This will require a fix so I do not anticipate being able to do any further tests before you leave today.

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, A4 sent (A08 withdrawal was sent with an underlying A08 conviction). We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,

Siri.

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

Gary,

I just tried A1 now, the permit status and permit restriction look good. We can run the test cases now, but in case you make any changes for AKA DOB, we will need to run them again.

Also, I noticed that today the HC had 1 AKA DOB on the HC message and also the AKA Name count is 05, instead of 03. Could you please take a look at that?

Siri, I made the fix to HC permit status and the H6 restriction codes.

I will investigate the ability to maintain alias DOB in the system along with the alias names. I am ready if you want to run A1 again unless you'd rather wait until the DOB issue is addressed.

Thanks
Gary

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Siri,

I will need to make a fix for the permit status. To clarify, this is HC parameter DDLPST, correct?

There are restrictions on the permit, including P. So H6 will also need to be fixed. Hopefully I will be ready for a retest before you need to leave today.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Thanks Siri,

I will investigate/fix the max permit endorsements as well as the license status. Just to clarify, even though the CDL is suspended per the withdrawal, you still expect both the comm and non-comm status to be LIC?

Regarding aliases, we only implement the name alias. If it is necessary to include DOB alias, let me know and I can discuss further with Mina.

thanks

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, A4 sent (A08 withdrawal was sent with an underlying A08 conviction). We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Ok, I sent A3 and noticed the following:

The conviction ID for the U09 is blank on the H3 message.

The withdrawal for the U09 is not present on H5 message. Sorry, I forgot to mention in previous email that as U09 (a major offense) was sent on the ROOSC, we expect at least 1 year withdrawal from AI, for the reported U09 and this withdrawal will be linked to the underlying conviction.

Thank you,
Siri.

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

On the SB I sent, noticed the following:

H3 message:

Received the following error on H3 message: 'INVALID ACD CONVICTION CODE '

Looks like we have a W40, instead of a U09 on H3

H5 message:

The jurisdiction code withdrawing is AK, instead of AI for the U09.

H7 message:

The W40 is not linked correctly, (as there are no convictions with conviction Id, 01 and 02.)

Could you please take a look?

Thank you,
Siri.

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

Siri

The U09 conviction has been removed as well as the W40 withdrawal. However, the AI U09 withdrawal was not removed.

This will require a fix so I do not anticipate being able to do any further tests before you leave today.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, A4 sent (A08 withdrawal was sent with an underlying A08 conviction). We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

This email comes from an external source, so remember, Think Before You Click!
On the SB I sent, noticed the following:

H3 message:

Received the following error on H3 message: 'INVALID ACD CONVICTION CODE '

Looks like we have a W40, instead of a U09 on H3

H5 message:

The jurisdiction code withdrawing is AK, instead of AI for the U09.

H7 message:

Document ID: 0.7.1187.57999 DMV00035236

The W40 is not linked correctly, (as there are no convictions with conviction Id, 01 and 02.)

Could you please take a look?

Thank you,
Siri.

Gary,

I just tried A1 now, the permit status and permit restriction look good. We can run the test cases now, but in case you make any changes for AKA DOB, we will need to run them again.

Also, I noticed that today the HC had 1 AKA DOB on the HC message and also the AKA Name count is 05, instead of 03. Could you please take a look at that?

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Siri,

I will need to make a fix for the permit status. To clarify, this is HC parameter DDLPST, correct?

There are restrictions on the permit, including P. So H6 will also need to be fixed. Hopefully I will be ready for a retest before you need to leave today.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, A4 sent (A08 withdrawal was sent with an underlying A08 conviction). We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

On the SB I sent, noticed the following:

H3 message:

Received the following error on H3 message: 'INVALID ACD CONVICTION CODE '

Looks like we have a W40, instead of a U09 on H3

H5 message:

The jurisdiction code withdrawing is AK, instead of AI for the U09.

H7 message:

Document ID: 0.7.1187.88337 DMV00035257

The W40 is not linked correctly, (as there are no convictions with conviction Id, 01 and 02.)

Could you please take a look?

Thank you,
Siri.

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Hi Dillon,

I promised to let you know about test case 30. I changed the wording as below: The VIN should come from the chassis which is first stage and the make and model year from the second stage. The data in the old fields is from first stage.

030	M - 02	A vehicle in your state is re-titled, odometer reading is UNKNOWN. The vehicle has been reconstructed. The VIN is being used from the first stage vehicle and Make/Model Year from the body (second stage). The VIN already exists in NMVTIS with different Make / Mod Yr (Old Veh Info in spreadsheet is from first stage veh).	Title	In-state	Salvage Certificate	AISTRUCTRTST01M02	PONT	2

Sorry for any confusion.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

Siri

The U09 conviction has been removed as well as the W40 withdrawal. However, the AI U09 withdrawal was not removed.

This will require a fix so I do not anticipate being able to do any further tests before you leave today.

Yes, if you have an additional withdrawal for A08, there will be 3 linkages and the effective date for the A08 can be same as W40 and it'll be effective for 1 year from the date you choose.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, A4 sent (A08 withdrawal was sent with an underlying A08 conviction). We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Ok, I sent A3 and noticed the following:

The conviction ID for the U09 is blank on the H3 message.

The withdrawal for the U09 is not present on H5 message. Sorry, I forgot to mention in previous email that as U09 (a major offense) was sent on the ROOSC, we expect at least 1 year withdrawal from AI, for the reported U09 and this withdrawal will be linked to the underlying conviction.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

On the SB I sent, noticed the following:

H3 message:

Received the following error on H3 message: 'INVALID ACD CONVICTION CODE '

Looks like we have a W40, instead of a U09 on H3

H5 message:

The jurisdiction code withdrawing is AK, instead of AI for the U09.

H7 message:

The W40 is not linked correctly, (as there are no convictions with conviction Id, 01 and 02.)

Could you please take a look?

Thank you,
Siri.

Ok, the A08 withdrawal was sent with an underlying A08 conviction. We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

Hello Susan,

It's only TC015 experiencing this issue? I'll look into it.

Document ID: 0.7.1187.50799 DMV00035300

Right now I'm attempting to get the unsolicited tests cases properly seeded into our database. When I originally attempted to seed the data I didn't catch that these failed. AK title number is limited to 8 characters, so I've attached your spreadsheet from yesterday with the title numbers for these test cases changed from AITITLEXXXXX to AIXXXXXX where XXXXXX is the original numeric suffice left-padded with zeros. There is however one other change I need to make as the data doesn't quite look right. I'll let you know as soon as it's ready.

Thank you,

Hi Dillon,

When I ran the inquiry again on TC015 I found the following missing from the HC. Are you making these mandatory as they are fields that you show on the questionnaire that you will always send?

Vehicle Type
Title Issue Date
Title Status Date
Odometer Date

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've now fixed the issue with both @@@@ and lien address/date being populated. That record does not have a lien on it, and should no longer return lien information.

Thank you,

Hi Dillon,

TC015 looks good but when I did the inquiry, you responded with a Lienholder Address and Date but no Lienholder Name and the Number of Active Liens is set to 00 on the HC. I know you are working on removing the @@@@; and lien date when there is no lienholder but given an actual address was returned for the lienholder, could you please let me know if you actually do have a lien entered for this vehicle?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - TC 014

Hello Susan,

Here are a few more test cases:

TC015 – Successful In-State Change
TC016 – Snow Vehicles can only be registered, not titled. I've updated the spreadsheet and performed a title undo to reflect this.
TC019 – Theft Response
TC020 – Theft Response

For TC018, I'm not finding anything in our type tables or the spreadsheet correlating to a "Commercial Trailer".

I'll be doing bug fixes and more first/single stage tests tomorrow and Monday while you're out.

Thank you,

Subject: AK NMVTIS Testing - 002, 006, 011, 013, 014

Hello Susan,

I've attached screenshots for TC002, 006, 011, 013, and 014, as well as my updated spreadsheet.

I encountered a "TITLE NOT ON FILE" warning on the R3 returned in response to the IU issued for TC011. The corresponding screenshot includes a snippet that shows this warning being present in the UI. I did not continue with the titling process for this test case.

Thank you,

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, I sent A3 and noticed the following:

The conviction ID for the U09 is blank on the H3 message.

The withdrawal for the U09 is not present on H5 message. Sorry, I forgot to mention in previous email that as U09 (a major offense) was sent on the ROOSC, we expect at least 1 year withdrawal from AI, for the reported U09 and this withdrawal will be linked to the underlying conviction.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

This email comes from an external source, so remember, Think Before You Click!
On the SB I sent, noticed the following:

H3 message:

Received the following error on H3 message: 'INVALID ACD CONVICTION CODE '

Looks like we have a W40, instead of a U09 on H3

H5 message:

The jurisdiction code withdrawing is AK, instead of AI for the U09.

H7 message:

The W40 is not linked correctly, (as there are no convictions with conviction Id, 01 and 02.)

Could you please take a look?

Thank you,
Siri.

Ok, the A08 withdrawal was sent with an underlying A08 conviction. We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Siri,

I will need to make a fix for the permit status. To clarify, this is HC parameter DDLPST, correct?

There are restrictions on the permit, including P. So H6 will also need to be fixed. Hopefully I will be ready for a retest before you need to leave today.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

Siri

The removal of the W40 withdrawal was working as designed, although I made a fix that does not directly impact the test. I have removed the U09 action and am ready to move on to A09.

Gary,

That part usually depends on the States as to how they have their procedures implemented(if its automatic or done manually)

Thank you,
Siri.

And maybe I need to clarify this first. Per your email, are you expecting the W40 and U09 withdrawals to automatically be deleted when the U09 conviction was negated? Or are you implying that negating the withdrawals is a follow up activity I need to do?

I did not expect W40 withdrawal to be automatically negated since it also linked to A08 conviction so just wanted to be clear.

Thanks

Siri

The U09 conviction has been removed as well as the W40 withdrawal. However, the AI U09 withdrawal was not removed.

This will require a fix so I do not anticipate being able to do any further tests before you leave today.

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

I created the W40 withdrawal linking A08 and U09.

But can you please clarify adding an additional 1 year withdrawal to A08. I don't believe I did that last week. Should it have an effective date following the initial withdrawal on A08 for a full year?

So after this step, do you expect A08 conviction will have 3 linking withdrawals?

Ok, A4 sent (A08 withdrawal was sent with an underlying A08 conviction). We expect the following:

An additional 1 year withdrawal from AI for the A08 and also a W40 withdrawal from AI due to the accumulation of 2 major offenses (A08 and U09). The W40 needs to be linked to A08 and U09.

Thank you,
Siri.

Hi Siri

I've addressed these recent problems. However, it was necessary to remove the U09 conviction as well as the linked withdrawal I subsequently created.

Can you please resend the U09 conviction per step A2? Would you prefer I also remove the A08 withdrawal and conviction so that steps A3 and A4 could be repeated?

Thanks
Gary

Gary,

I just tried A1 now, the permit status and permit restriction look good. We can run the test cases now, but in case you make any changes for AKA DOB, we will need to run them again.

Also, I noticed that today the HC had 1 AKA DOB on the HC message and also the AKA Name count is 05, instead of 03. Could you please take a look at that?

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri, I made the fix to HC permit status and the H6 restriction codes.

I will investigate the ability to maintain alias DOB in the system along with the alias names. I am ready if you want to run A1 again unless you'd rather wait until the DOB issue is addressed.

Thanks
Gary

This email comes from an external source, so remember, Think Before You Click!
Good Morning Gary,

Just wanted to let you know regarding the AKA DOB, the following is mentioned in the SPEXS Master Spec:

Note: If AKA Name and AKA DOB is transmitted, each AKA Name must be paired with an AKA Date of Birth. The first occurrence must be populated before the
second occurrence, which must be populated before the third occurrence.

Also, I saw the test results from our SPEXS structured testing, earlier this year with AK, and the AKA Name/DOB are present, in the old system.

Thank you,
Siri.

Siri,

I will need to make a fix for the permit status. To clarify, this is HC parameter DDLPST, correct?

There are restrictions on the permit, including P. So H6 will also need to be fixed. Hopefully I will be ready for a retest before you need to leave today.

Gary,

Yes, I see the permit now but could you please add the permit Status and also If we have a 'P' or 'S' permit endorsements, we need a 'P' permit restriction as well. So, could you please add that?

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Siri can you help clarify the permit endorsements parameter DDLEP1 per Driver A setup? It is in the permit info block, 15/1 although there are not current permits for the driver. There are 3 instances of the block and this parameter includes up to 5 codes.

Would you expect there is a permit for the drive or would you instead expect to see the 5 commercial license endorsements loaded into the first instance of the DDLEP1 parameter?

Thanks
Gary

Gary,

The existing withdrawal can be inactive(it has been re-instated), in which case, that the status can be LIC.

Regarding the DOB aliases, let me talk to our team and get back to you.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Thanks Siri,

I will investigate/fix the max permit endorsements as well as the license status. Just to clarify, even though the CDL is suspended per the withdrawal, you still expect both the comm and non-comm status to be LIC?

Regarding aliases, we only implement the name alias. If it is necessary to include DOB alias, let me know and I can discuss further with Mina.

thanks

Hi Gary,

I just sent A1 and have a couple of questions :

I see the 5 driver license endorsements, could you please add the max permit endorsements as well, per the driver A setup?

Also, could you please add the 3 AKA DOBs and would it be possible to have the commercial and non-commercial status as LIC instead of NOT(in order to see the change in status as we execute the rest of the test cases in the driver stream)?

Thank you,
Siri.

Hi Dillon,

I promised to let you know about test case 30. I changed the wording as below: The VIN should come from the chassis which is first stage and the make and model year from the second stage. The data in the old fields is from first stage.

030	M - 02	A vehicle in your state is re-titled, odometer reading is UNKNOWN. The vehicle has been reconstructed. The VIN is being used from the first stage vehicle and Make/Model Year from the body (second stage). The VIN already exists in NMVTIS with different Make / Mod Yr (Old Veh Info in spreadsheet is from first stage veh).	Title	In-state	Salvage Certificate	AISTRUCTRTST01M02	PONT	2

Sorry for any confusion.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC004

Also, there was a result for S7 returned by the inquiry. The spreadsheet doesn't show any information besides which VIN to use. Is this intended?

Subject: NMVTIS AK Rewrite - TC004

Good morning Susan,

Thank you for the clarification.

I've just ran the inquiry on TC004. Please let me know when I can proceed.

Thank you,

Subject: NMVTIS AK Rewrite - TC031

This email comes from an external source, so remember, Think Before You Click!
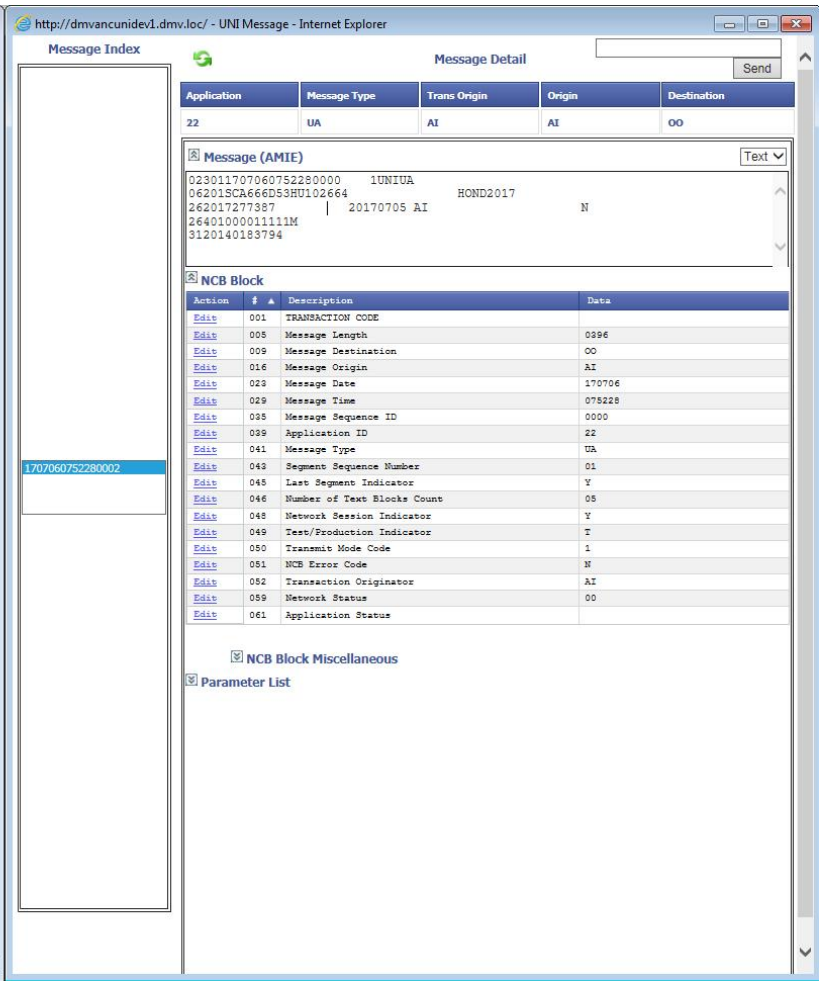
Hi Dillon,



I promised to let you know about test case 30. I changed the wording as below: The VIN should come from the chassis which is first stage and the make and model year from the second stage. The data in the old fields is from first stage.

030	M - 02	A vehicle in your state is re-titled, odometer reading is UNKNOWN. The vehicle has been reconstructed. The VIN is being used from the first stage vehicle and Make/Model Year from the body (second stage). The VIN already exists in NMVTIS with different Make / Mod Yr (Old Veh Info in spreadsheet is from first stage veh).	Title	In-state	Salvage Certificate	AISTRUCTRTST01M02	PONT	2

Sorry for any confusion.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Gary,

The AKA DOB is there now but the license issue date is missing now, it was present before.

Thank you

Subject: RE: NMVTIS AK Rewrite - TC008

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Thank you,

Subject: RE: NMVTIS AK Rewrite - TC008

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK- MPR Summary Report
Attachments: MPR Summary Report- AK.xlsx

Title:	**CD90.7.2 MPR Summary Report**
Timing:	Monthly
Regulation:	**§ 384.207: Notification of Licensing** Within the period defined in § 383.73(h) of this subchapter, the State must: (a) Notify the operator of the CDLIS of each CLP or CDL issuance; (b) Notify the operator of the CDLIS of any changes in driver identification information; and (c) In the case of transfer issuances, implement the Change State of Record transaction, as specified by th CDLIS, in conjunction with the previous State of record and the operator of the CDLIS.
Transactions:	Add Driver (UA); Change State of Record (UD); Delete Driver (UE)
Purpose:	*This report displays summary information for the Master Pointer Records (MPRs) for a State of Record. The sur the addition of the new MPRs to the SOR, number of Change State of Records from and to the SOR, and the nun deleted. The subtotal of MPRs added or deleted to the State's MPR count for the month is also provided. It displ count of Master Pointer Records (MPRs) currently present in CDLIS and the percentage of Master Pointer Recor state has in CDLIS.
Report Sections:	**Header:** Report filter information **Detail:** The MPR(s) added and removed for a State of Record **Summary Section:** * Total number of new MPR(s) added * Total number of Change State of Record (CSOR) moved into State * Subtotal of MPR(s) added to State's Total MPR Count * Total number of MPR(s) deleted * Total number of Change State of Record (CSOR) moved out of State * Subtotal of MPR(s) removed from State's Total MPR Count * MPR Count as of Report Date * Total number of MPR(s) in CDLIS as of Report End Date * 'ST' Percentage (%) as of Report End Date

NOTE: The current MPR Summary Report for your state does not include the CDL status change of the Master Pointer Records (MPRs) i.e. the number of records that have upgraded to a CDLIS MPR and the number of records that have downgraded from a CDLIS MPR which impact the CDLIS MPR count at the Central Site. AAMVA is currently working on implementing a new report to include these counts.

Subject: RE: NMVTIS AK Rewrite - TC008

I've completed the transaction. It resulted in an error that won't be avoided. This would be an example of where the NMVTIS menu would be used.

Thank you,

Subject: RE: NMVTIS AK Rewrite - TC008

This email comes from an external source, so remember, Think Before You Click!
My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

Document ID: 0.7.1187.50774 DMV00035413

I've passed the inquiry stage.

In general, a title mismatch is a manual stop. Thus the "if the clerk has reason to continue despite the mismatch."

Thank you,

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

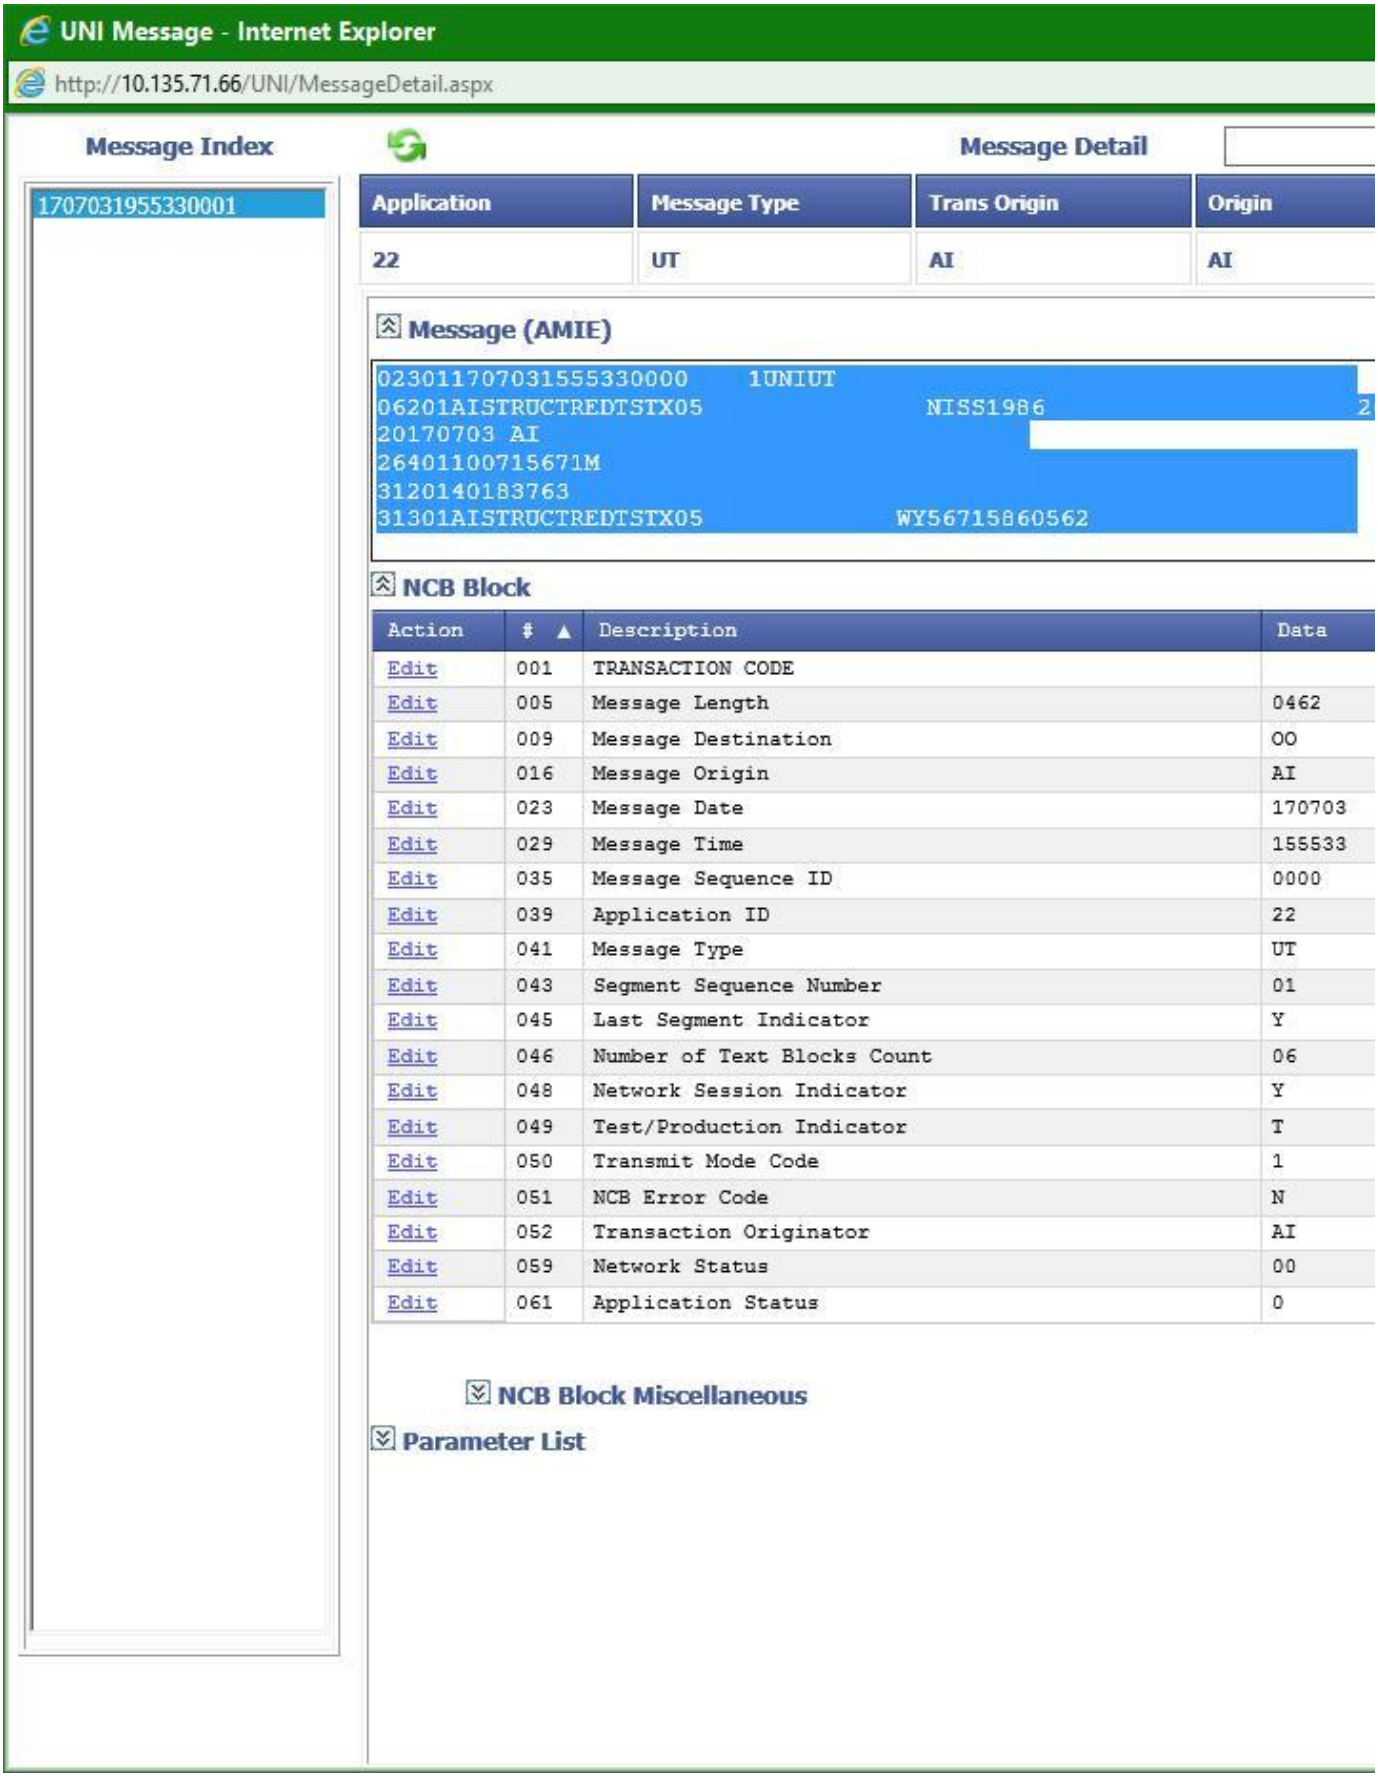
For this one I can no longer pull the UNI information to check the format of the message. Could you please copy the message contents and send to me by doing the following.

Open the message in UNI (the one below is a UT message and yours will be a DM)

Document ID: 0.7.1187.50780 DMV00035419



Document ID: 0.7.1187.50780 DMV00035420

Click on the box on right with Grid and change to Text

Document ID: 0.7.1187.50780 DMV00035422

Select all the data in the message making sure to get all the spaces on the last line to the right of the data.

Document ID: 0.7.1187.50780 DMV00035424

And copy it to the email.

02301170703155533000 0 1UNIUT 06201AISTRUCTREDTSTX05 NISS1986 262017 277380 20170703
AI 26401100715671M 3120140183763 31301 AISTRUCTREDTSTX05 WY56715860562

Then send to me.

Also, could you also re-drive the SC that I sent on 6/7?

Thanks,
Susan Creighton / 703.908.5893 office

Yes, at this point you would contact the state and find out they made a mistake. Please go ahead and send me your screenshots. Once I verify then we will move forward with TC009 where you will need to back out your transaction so they can correct.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

This email comes from an external source, so remember, Think Before You Click!
My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Document ID: 0.7.1187.89610 DMV00035443

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

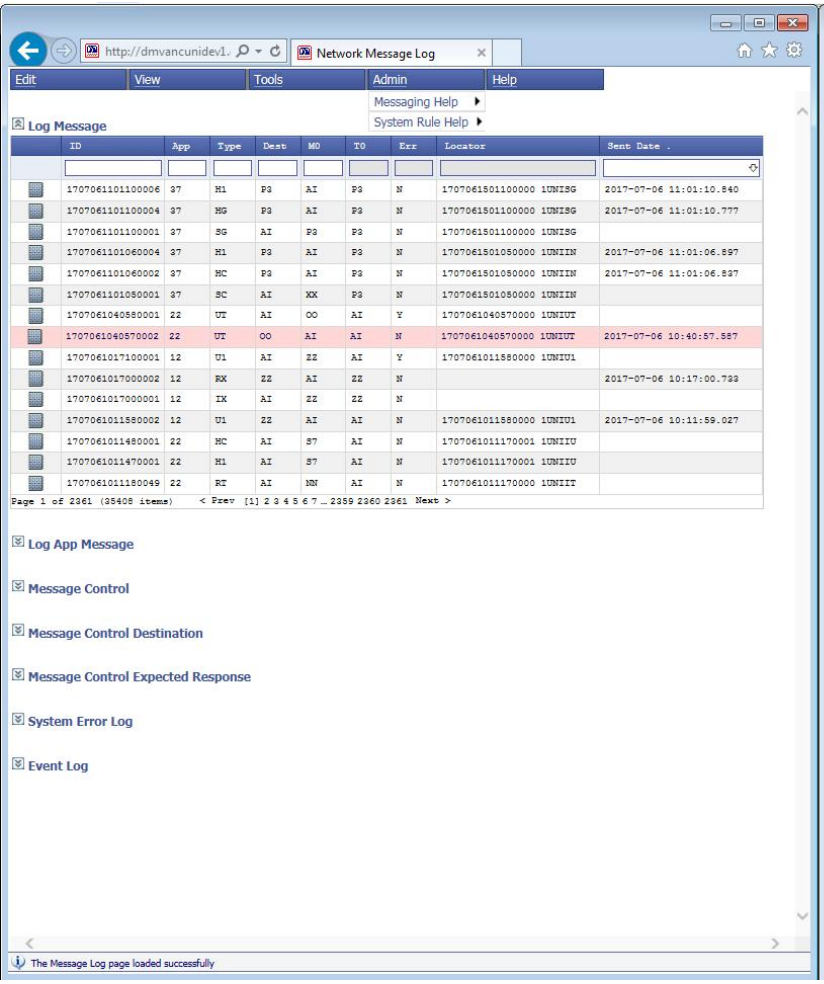
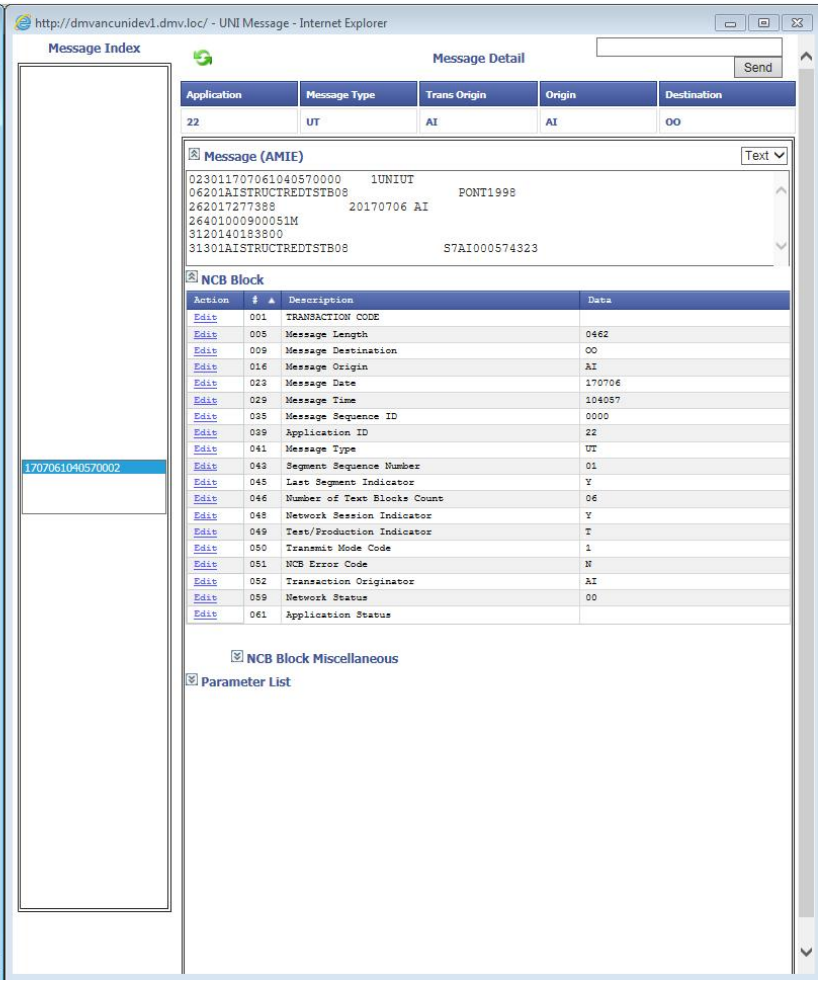
Subject: NMVTIS AK Rewrite - TC008



Susan,



I've run the inquiry on TC008. The NMVTIS record shows AI000574328 rather than AI000574323 as reported on the "title".

Thank you,

Hello,

I will be sending the following attachments in separate emails.

1. CSTIMS cheat sheets that you can use when training the field examiners (in addition to the training slides on AAMVA website).
2. Examiner Training Manual we received from a Jurisdiction.
3. Score sheets – Please note that these are provided as samples.

This is the 1st set of the attachments.

Regards,

Vikas Jain | Ph: 703-908-5763 | vjain@aamva.org | 4401 Wilson Blvd, Suite 700 • Arlington, VA 22203 • Tel 703.522.4200 | www.aamva.org |

Hello,

I sent an email to you all regarding the following on 6/30. I got the below notification about the undelivered email. I was off yesterday. Maybe I will have to send multiple emails to send all the attachments. I will try to send these today.

1. CSTIMS cheat sheets that you can use when training the field examiners (in addition to the training slides on AAMVA website).
2. Examiner Training Manual we received from a Jurisdiction.
3. Score sheets – Please note that these are provided as samples.

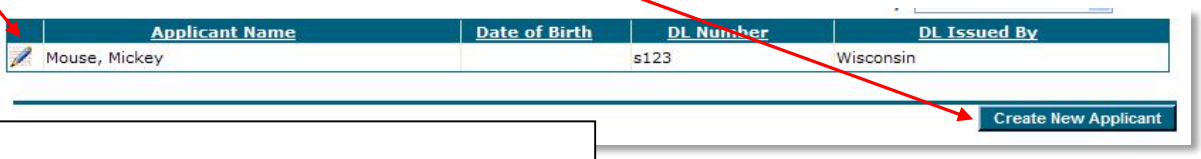
Schedule A Test In CSTIMS

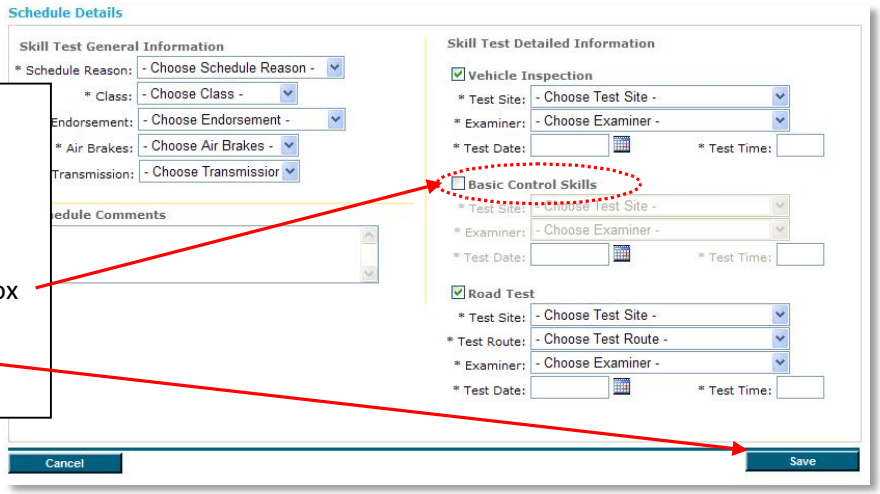


#1. After logging in; on the calendar, go to the **Day** and **Time** you'd like to schedule the test. Right click and select "Create a New Schedule"

#2. Type in "Driver License Number" OR "First Name" AND "Last Name"

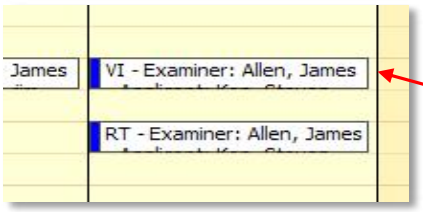
#3. If your customer shows in the system, click on the Pencil  icon; otherwise, click on "Create New Applicant"

#4. For a **new applicant**, enter the customer's information: License Number, First and Last Name, Phone Number, Date of Birth, and Address.



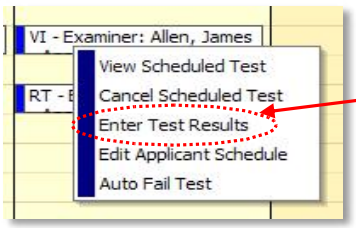
Then click on 

#5. At the bottom of the screen click on



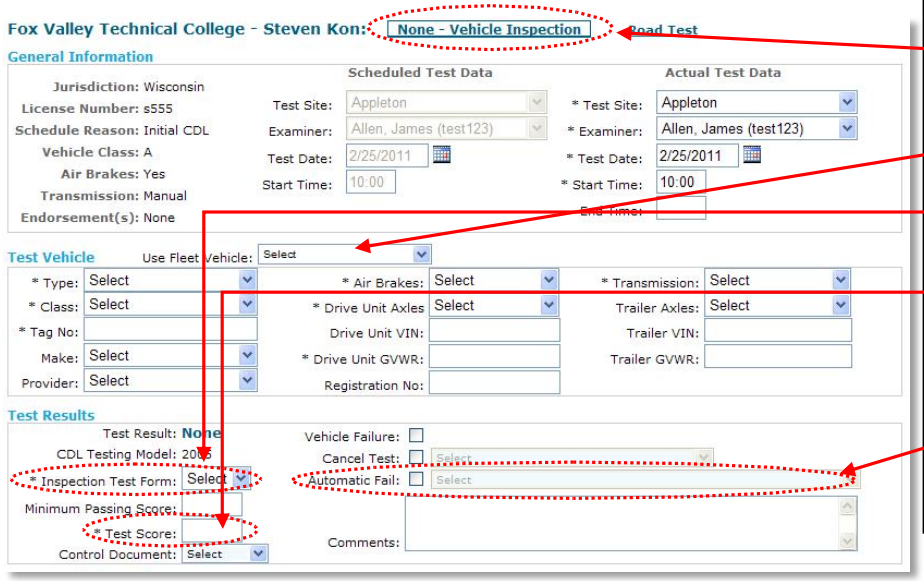
#6.

- Enter Skill Test General Information
- **Uncheck** "Basic Control Skills" box
- Click "Save"



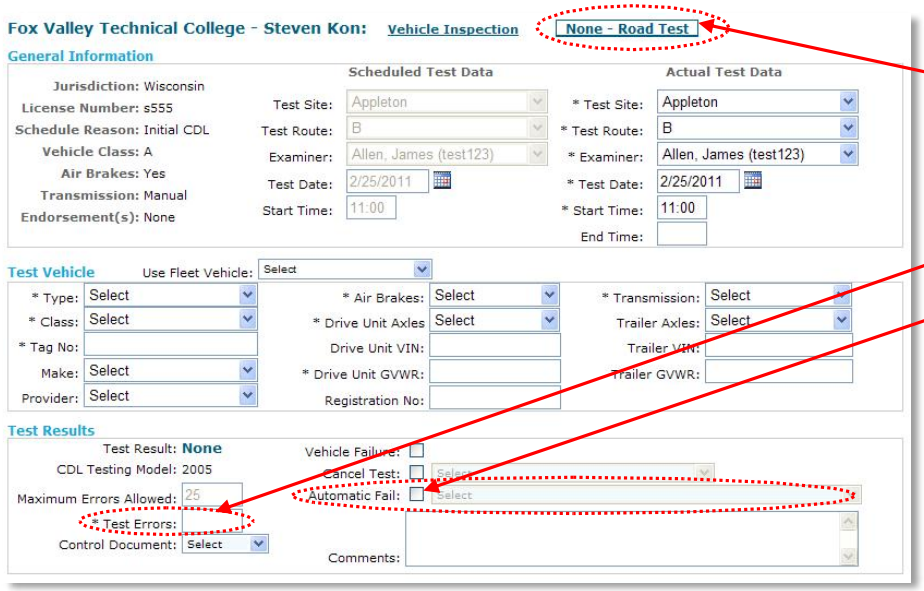
Now log out. When you finish giving the test turn the page to Enter Test Results.

Entering Test Results in CSTIMS



#1. After logging in, you will go directly to the calendar view.

- Find your customer on the date you gave the test.
- Right Click to open up a new menu

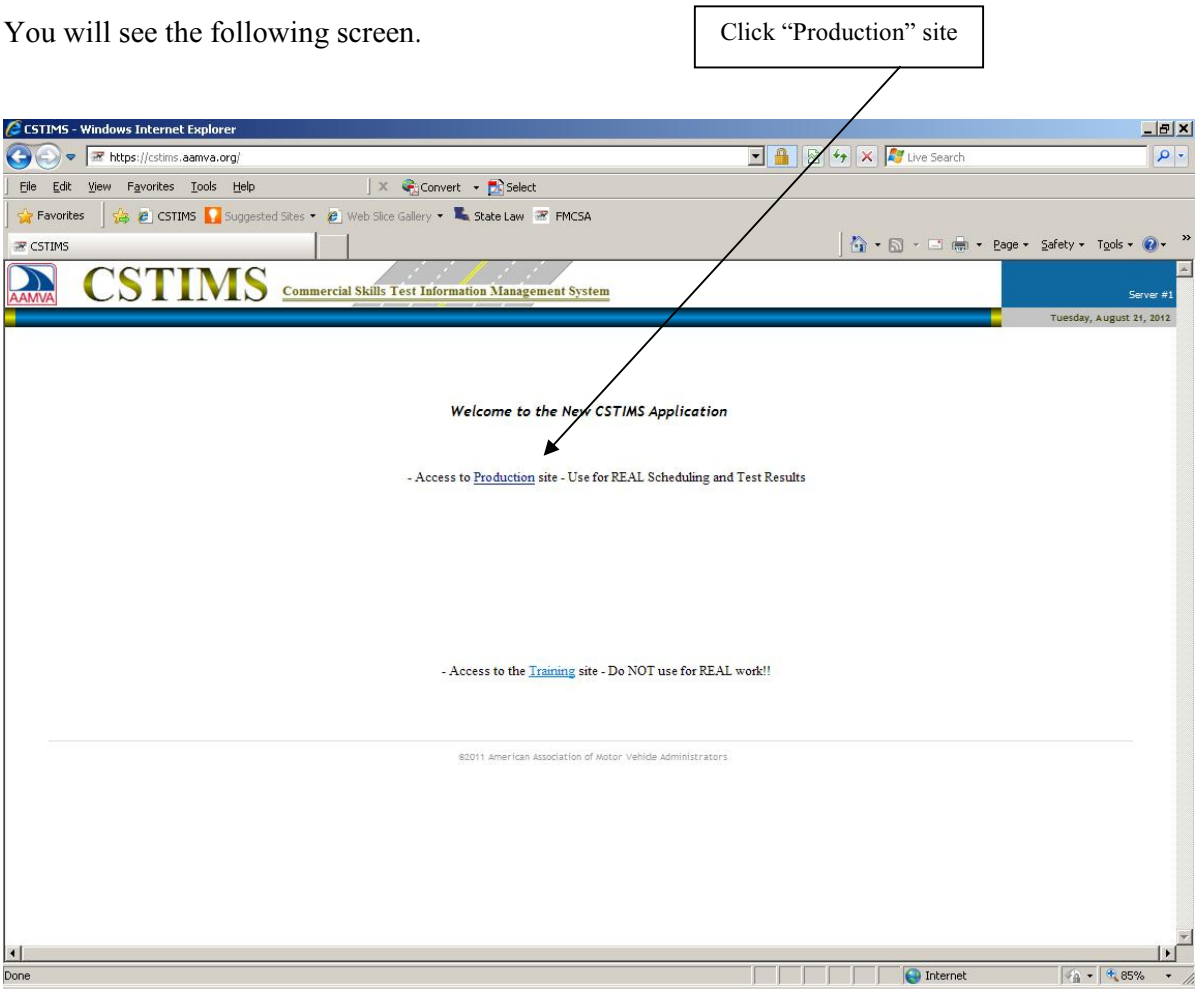


#2. Click on Enter Test Results

#3. Enter "Vehicle Inspection" Results:

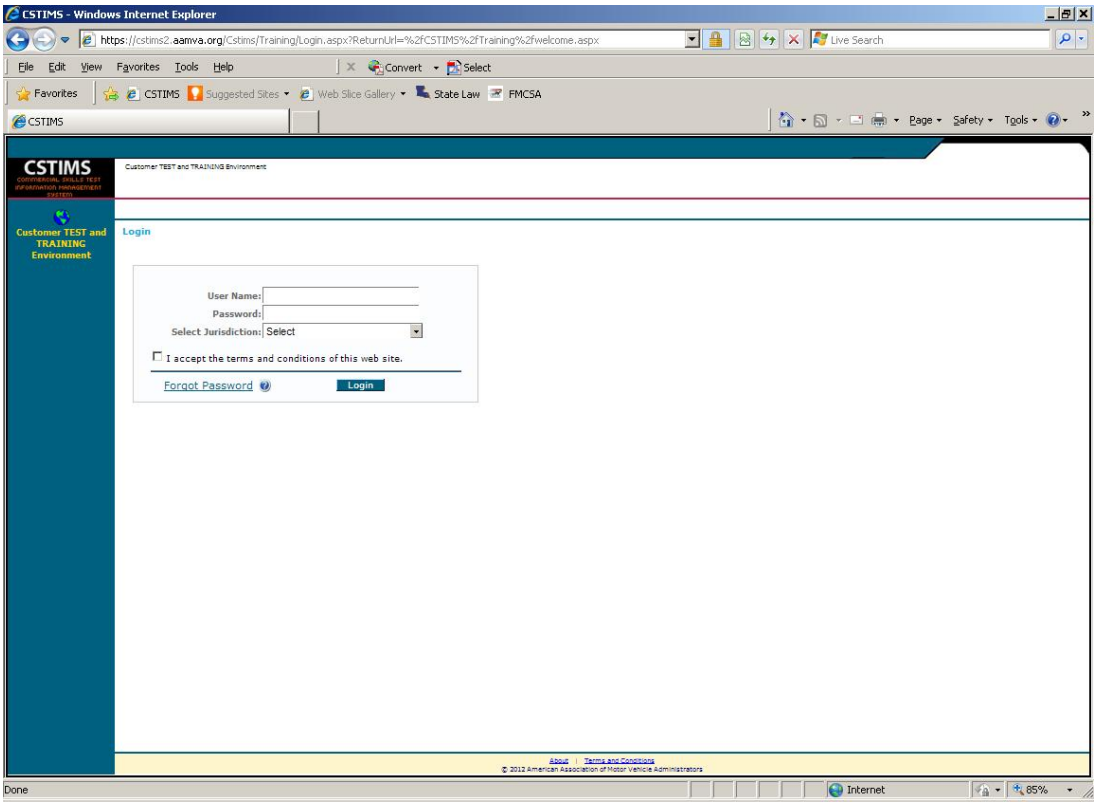
- Enter "Test Vehicle" information. "Use Fleet vehicles", if you have any.
- Select "FULL" for Inspection Test Form
- Enter "Test Score"
- Watch for any RED * this means something is missing!
- If customer fails, use "Automatic Fail"!
- Click on "Update"

#4. Enter "Road Test" Results



- Enter "Test Vehicle" information. "Use Fleet vehicles", if you have any.
- Enter Test Errors
- If customer fails use….. Automatic Fail!
- Select a "Control Document", if needed
- Click on "Update"

Federal Motor Carrier requires CDL Skills Test scores to be transmitted electronically to the Office of Motor Vehicles. This is accomplished by the use of the Commercial Skills Test Information Management System.

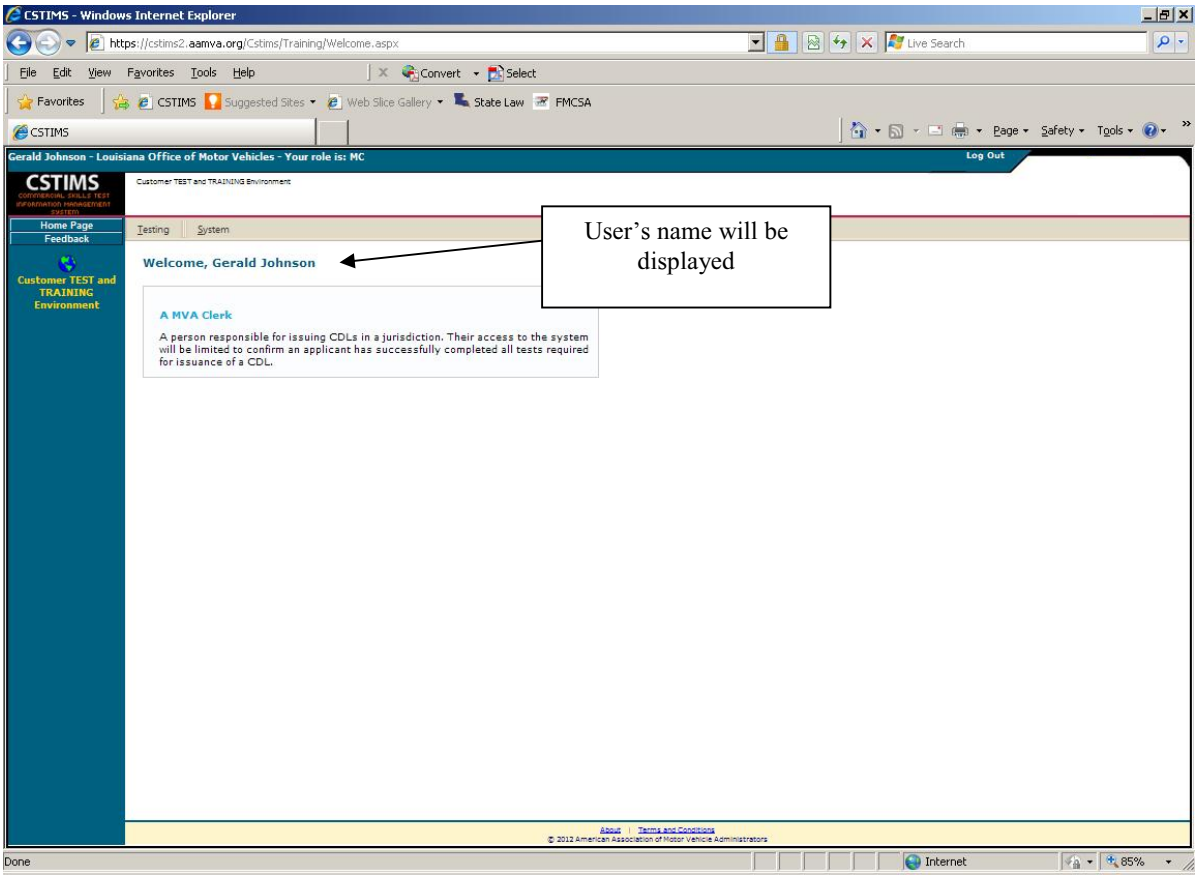


The CSTIMS (Commercial Skills Test Information Management System) database can be accessed at https://cstims2.aamva.org/

You will see the following screen.

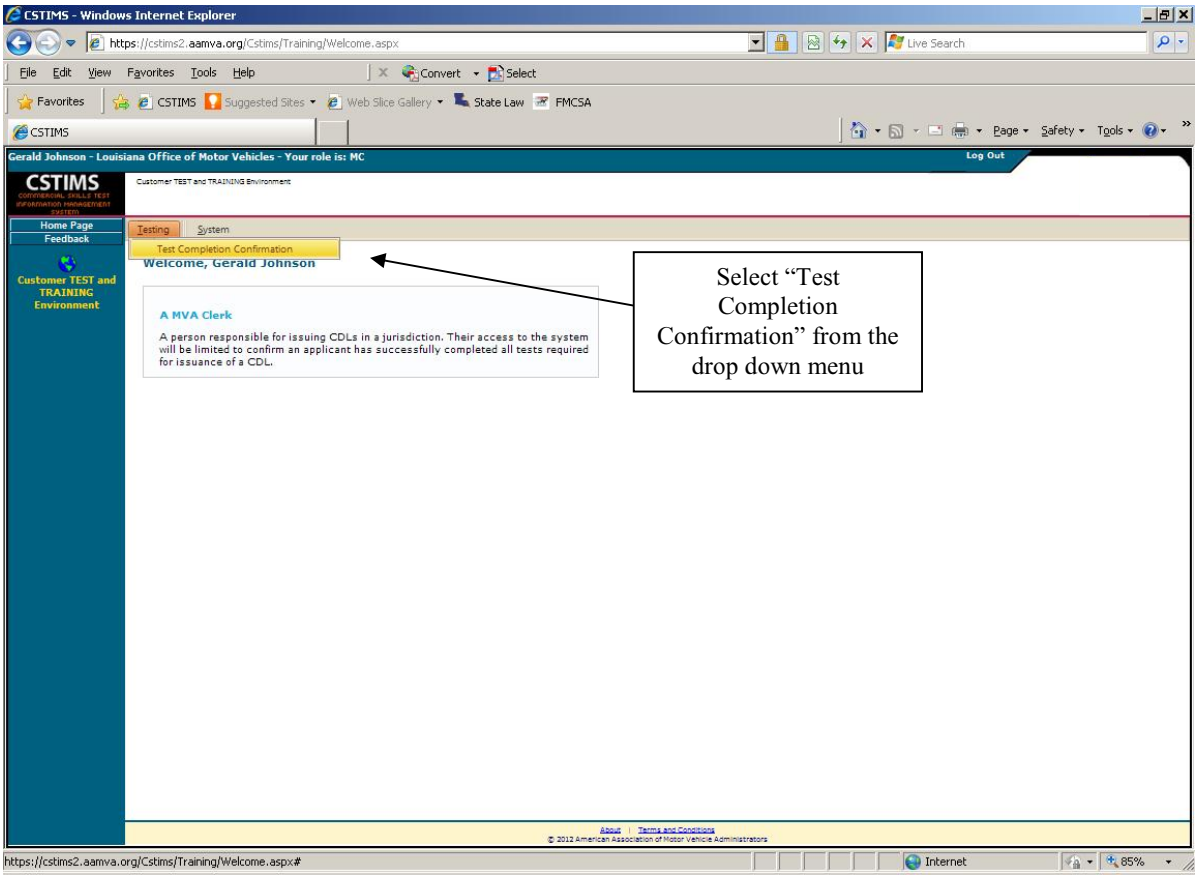
Click on "production".
After signing on and adding to your favorites, you will not see this screen again, if accessing CSTIMS from your favorites.

After clicking on the appropriate link, as indicated on page 2, you will see the following screen.



Enter the user name and password, which will be supplied by your manager. After entering the user name and password, the jurisdiction drop down menu will be displayed. Select XYZ Jurisdiction from the drop down menu. Click on the acceptance block and click login. You will be forced to enter a new password and enter a security question – initial use only.

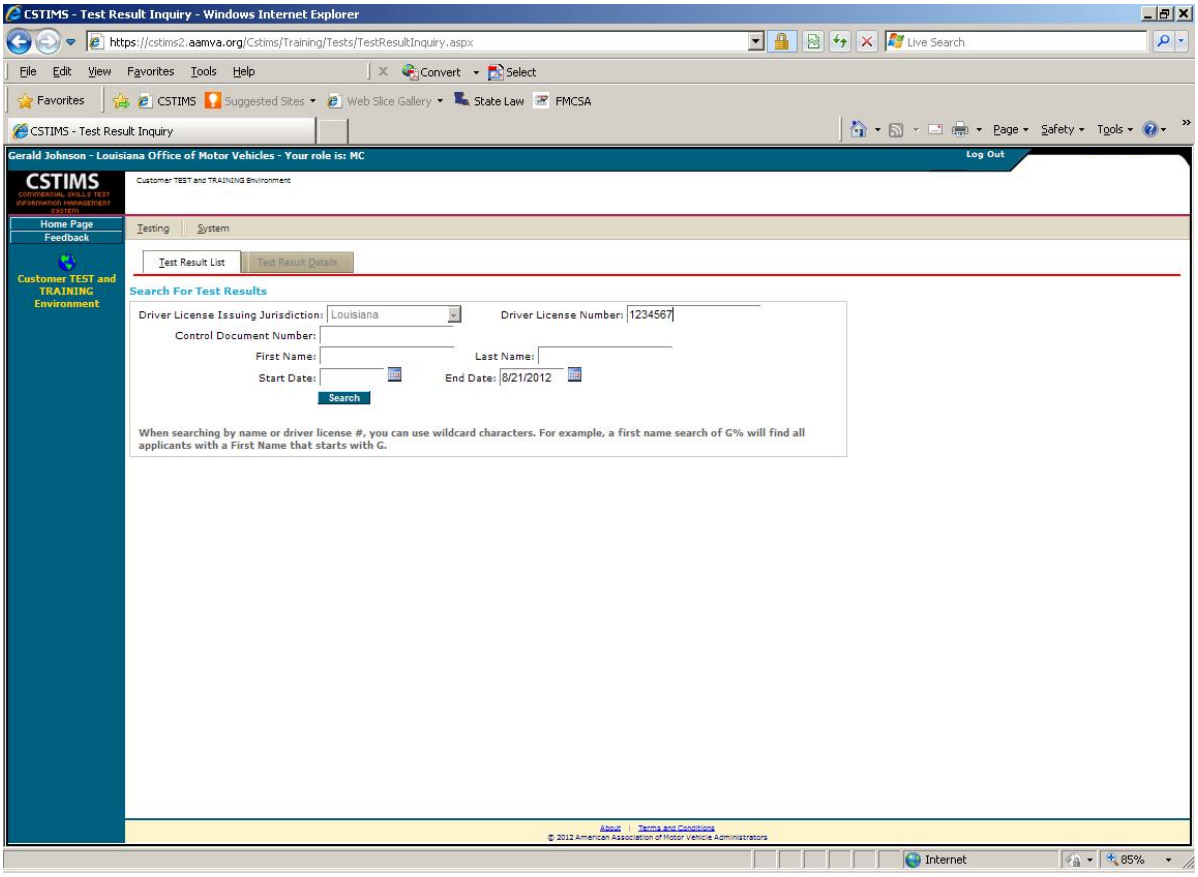
If you forget your password, you can click on the "Forgot Password" link.



The welcome screen will be displayed. This screen will show the user's name.

Document ID: 0.7.1187.89615-000004 DMV00035458

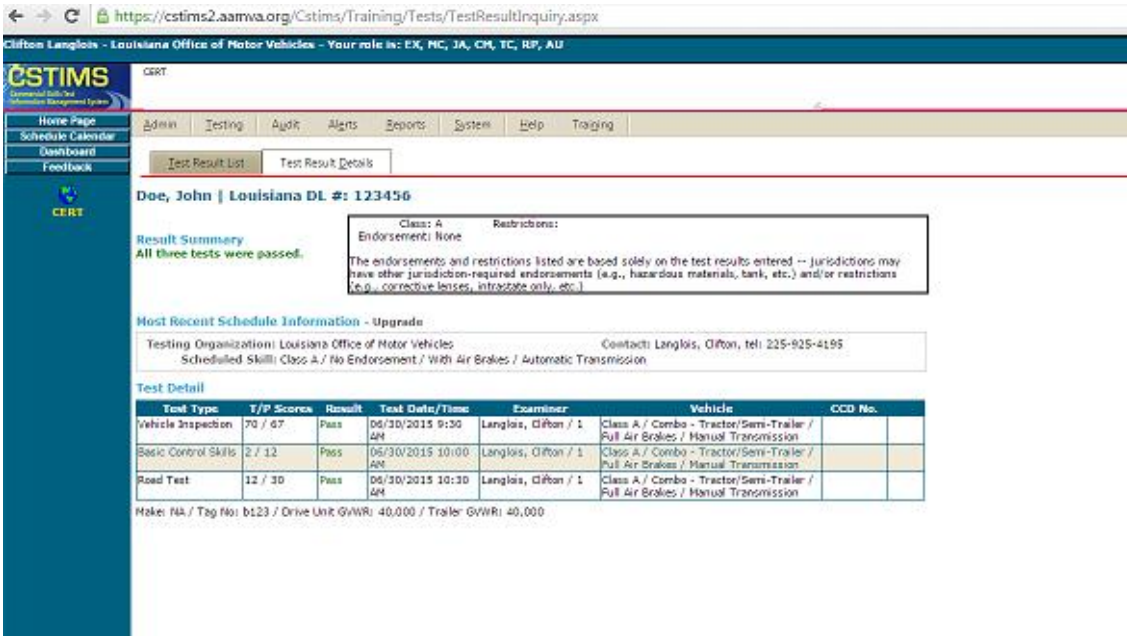
To access an applicant's test scores you must hover the mouse over the "testing" field for a drop down menu. Click on "Test Completion Confirmation".



Document ID: 0.7.1187.89615-000004 DMV00035459

You will be able to search for applicants in different ways: by license number, first name, or last name. Only use one way at a time. If using a XYZ Jurisdiction license number, you must use the entire number, including the zeros.

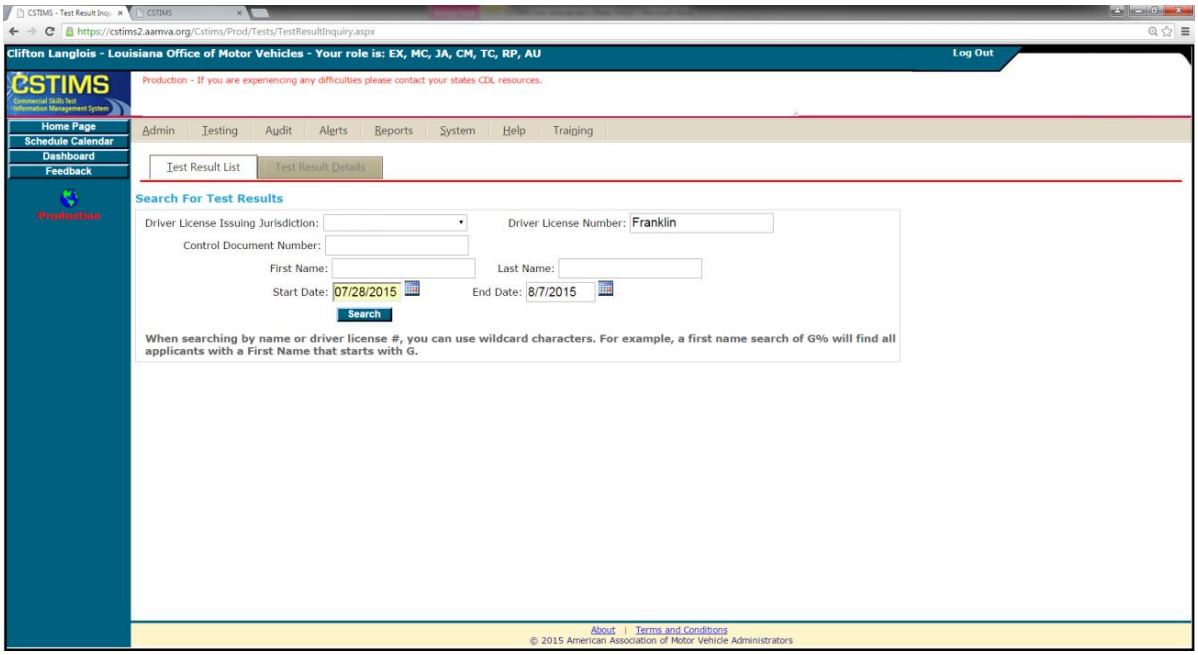
Document ID: 0.7.1187.89615-000004 DMV00035460



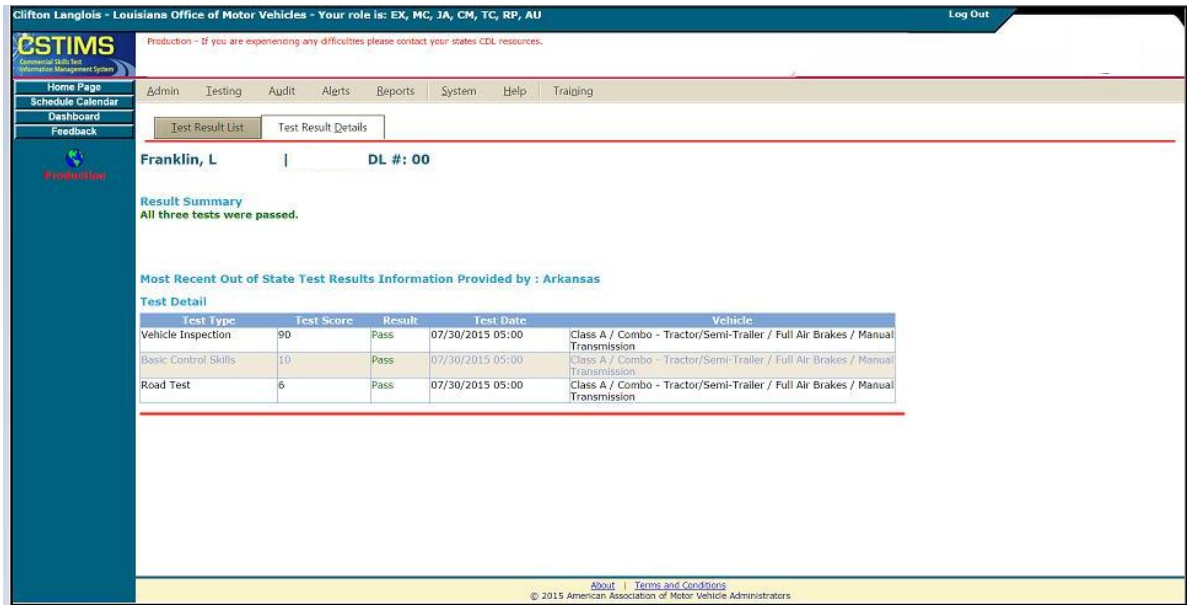
On this screen below, enter the information required to perform the search.

It will display any records found. The results will indicate test type, t/p scores (t=applicants score, p=score required to pass), the result (pass or fail), the date and time, the examiner's name, the vehicle used, and a certification control document number (The CCD No. field will be blank as we no longer use control document numbers).

Document ID: 0.7.1187.89615-000004 DMV00035461



You will also notice vehicle information such as class, vehicle type, brake type, and transmission type. Below the Road test scores, you will notice license plate and GVWR.

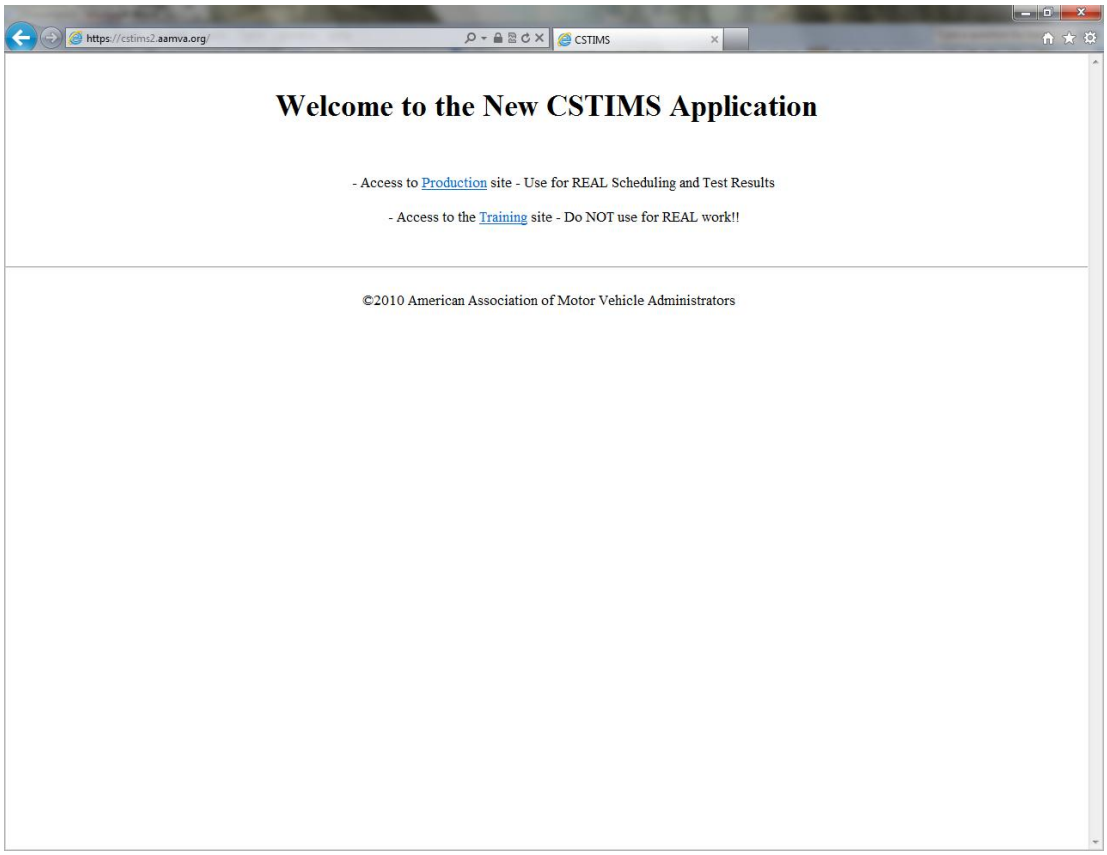


If an applicant tells you they skills tested out of state, check CSTIMS for verification.
On the Test Completion Confirmation screen, type in the last name in the last name field and search. If you have a common last name, you can shorten the responses by typing in a Start Date of a few days before the actual test date.

Document ID: 0.7.1187.89615-000004 DMV00035462

If you have multiple responses, click on the arrow next to your person's name.

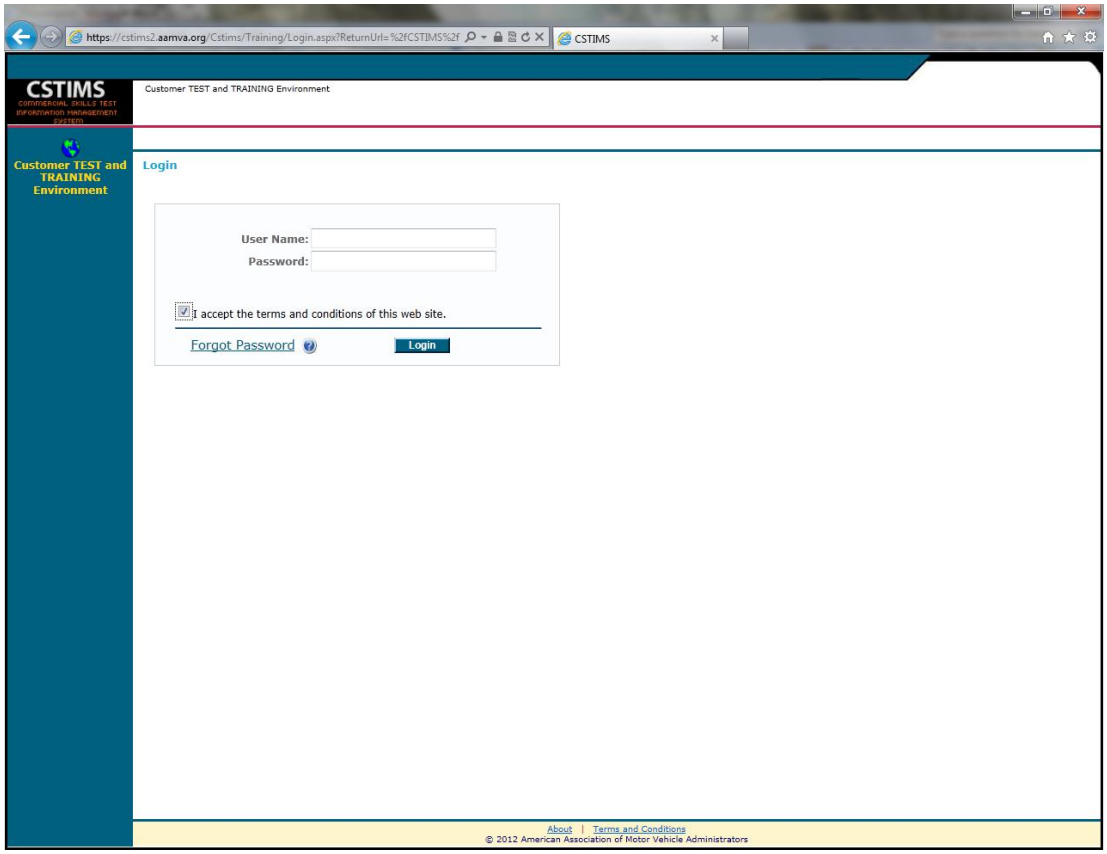
You should get a response similar to below. Verify the license number and name. Make sure all three parts of the test were passed.



Upon verification of test results in the CSTIMS application, you must:

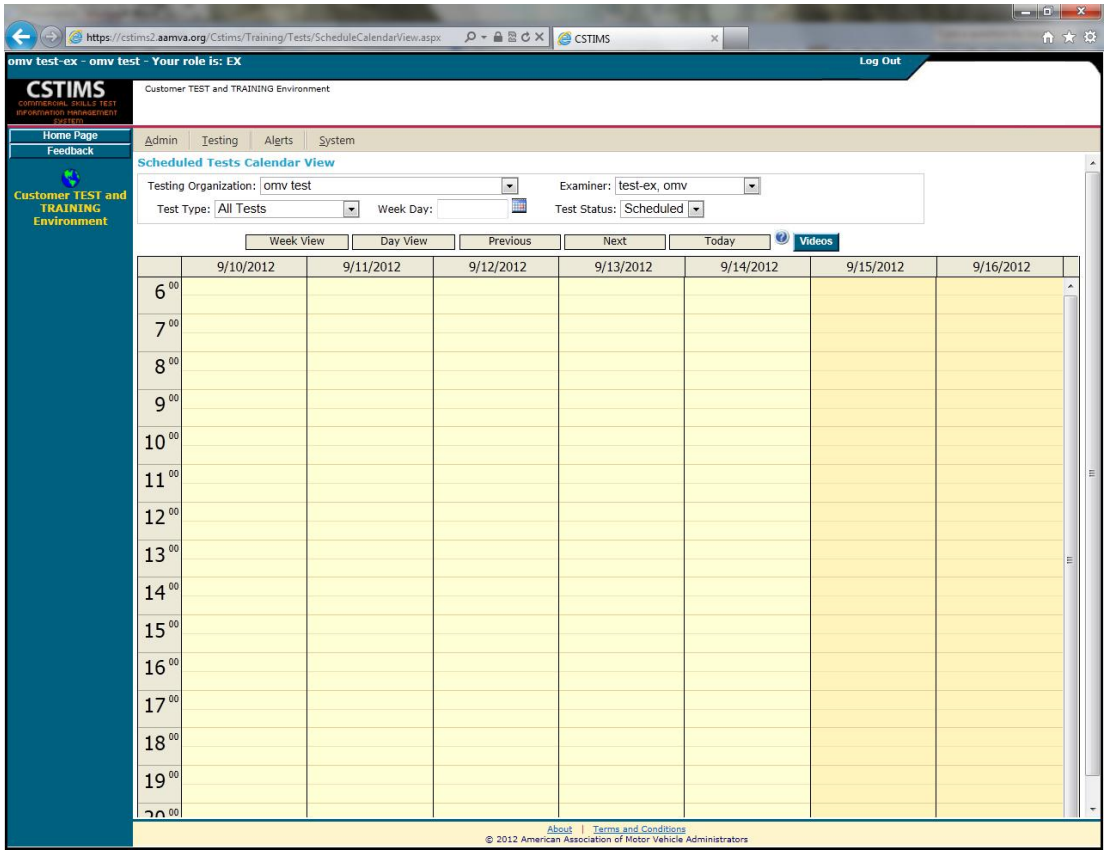
Document ID: 0.7.1187.89615-000004 DMV00035463

1) Record on the application, in remarks “CSTIMS Verified”.
2) Make a note on the application if the skills test was from another state.
3) Verify that the record you are reviewing is the applicant applying for a license.
4) Verify that all three parts of the skills test (vehicle inspection, basic control skills, and road test) all have “pass” under the result.
5) Verify the test date does not exceed the time limit allowed by policy.



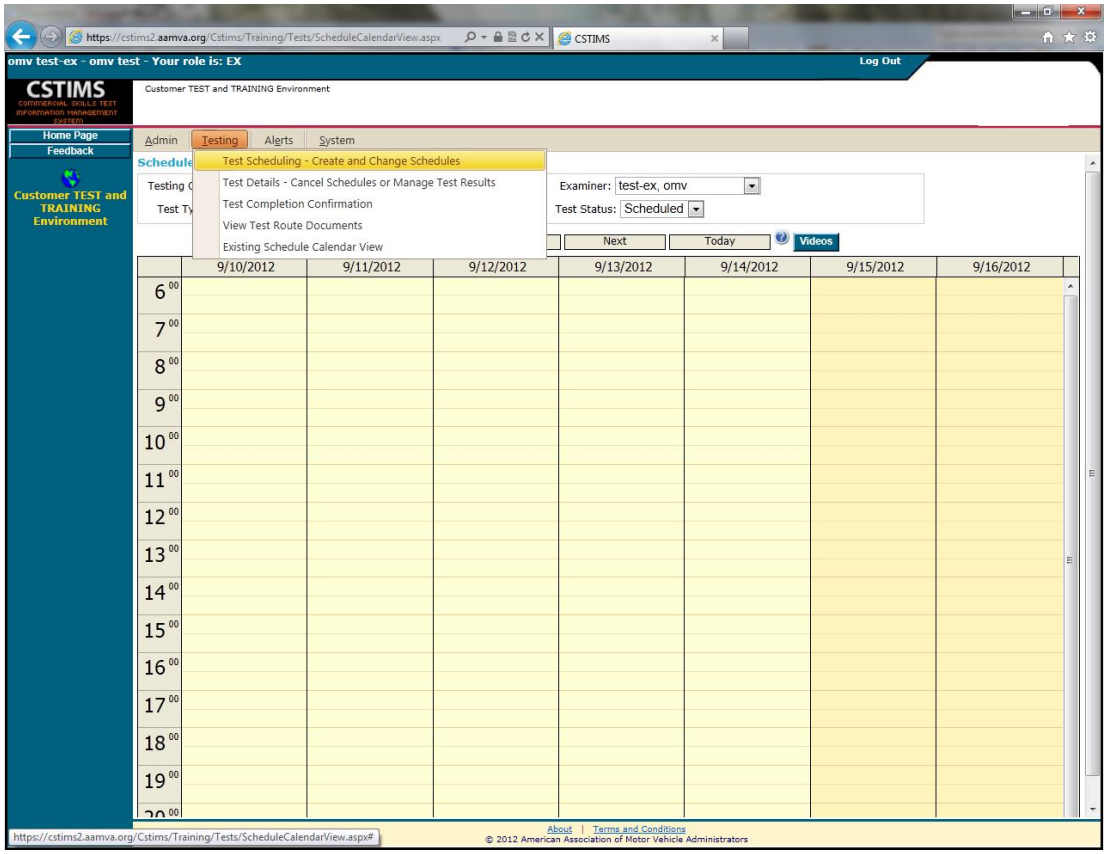
In addition to the above, the following applies:
If an applicant applying for a class A license skills tested out of state, they must provide the score sheet showing the vehicle type (tractor/trailer or truck/trailer) and the GVWR of the pulling unit and trailer. This is to determine whether the 55 and/or “O” restriction applies.

Document ID: 0.7.1187.89615-000004 DMV00035464



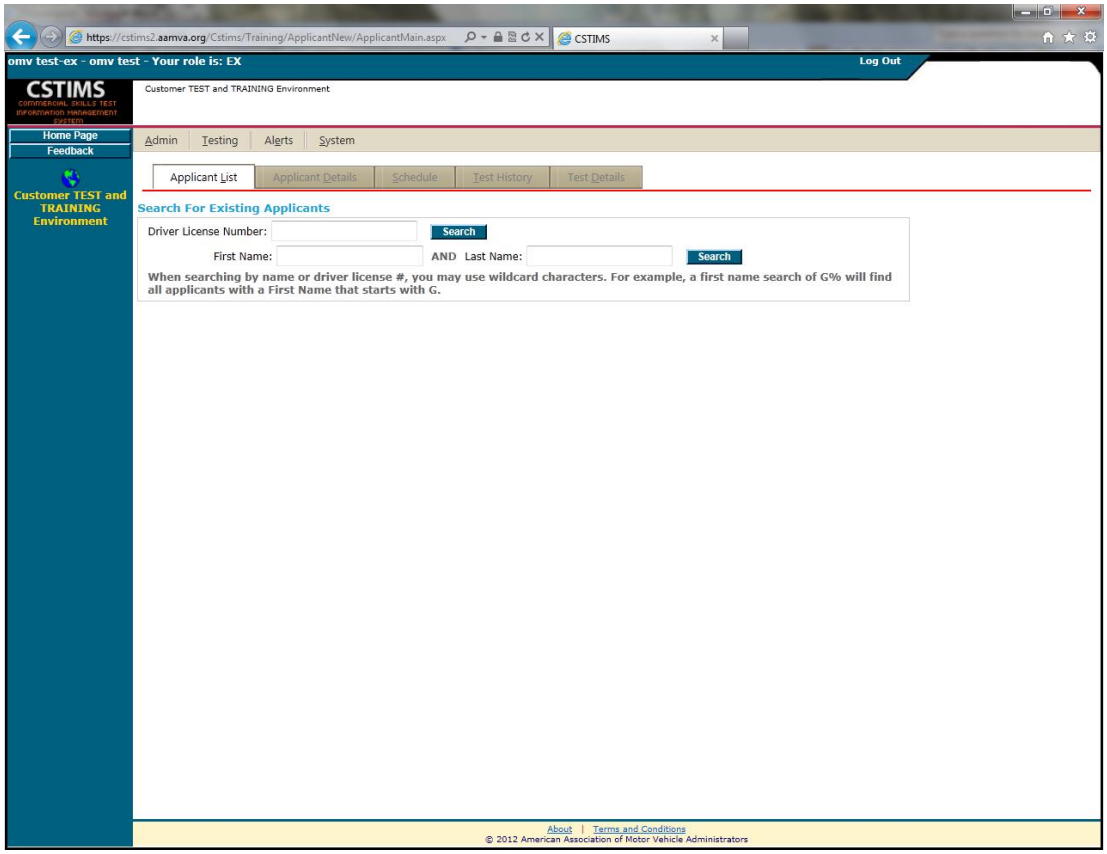
After setting up your password, access cstims at cstims2.aamva.org
Make sure to click the "Production" site
Once you have logged on, you can add the link to your "favorites", but will still be required to enter your user name and password each time.

Document ID: 0.7.1187.89615-000005 DMV00035465



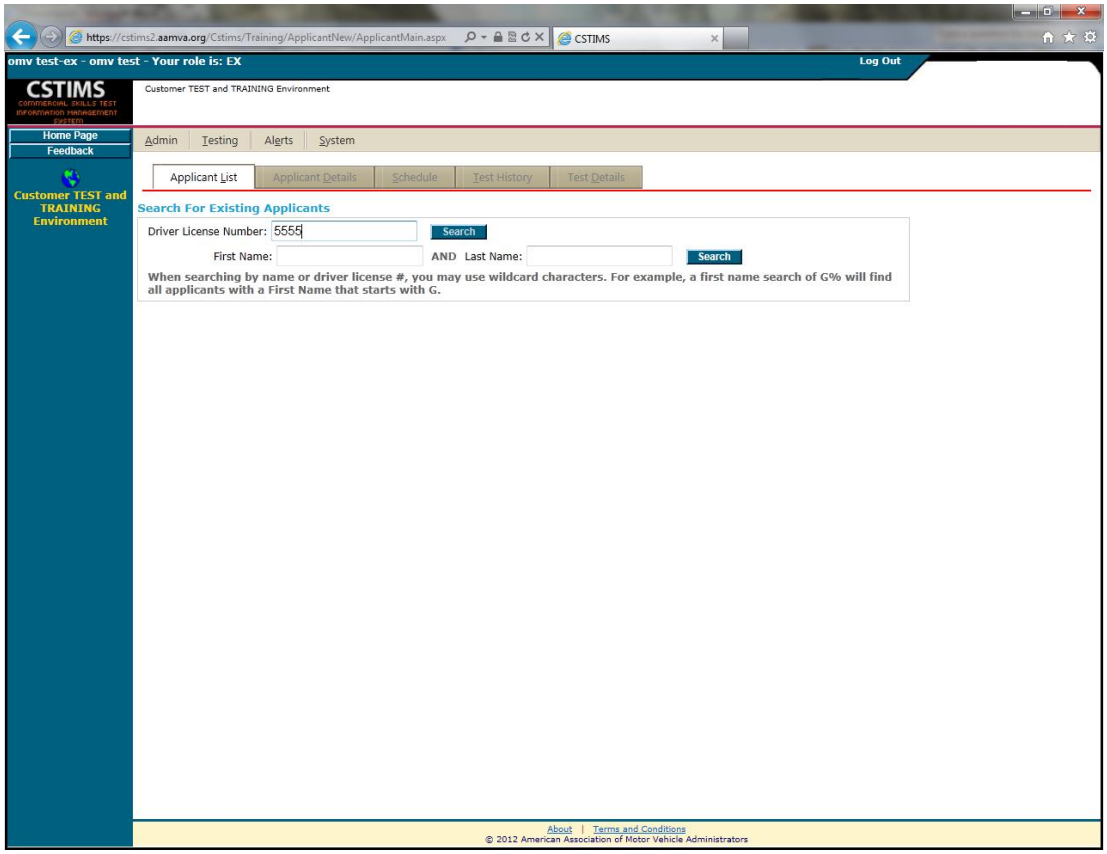
Type in your user name and password. Remember to check the "accept" box.

Document ID: 0.7.1187.89615-000005 DMV00035466

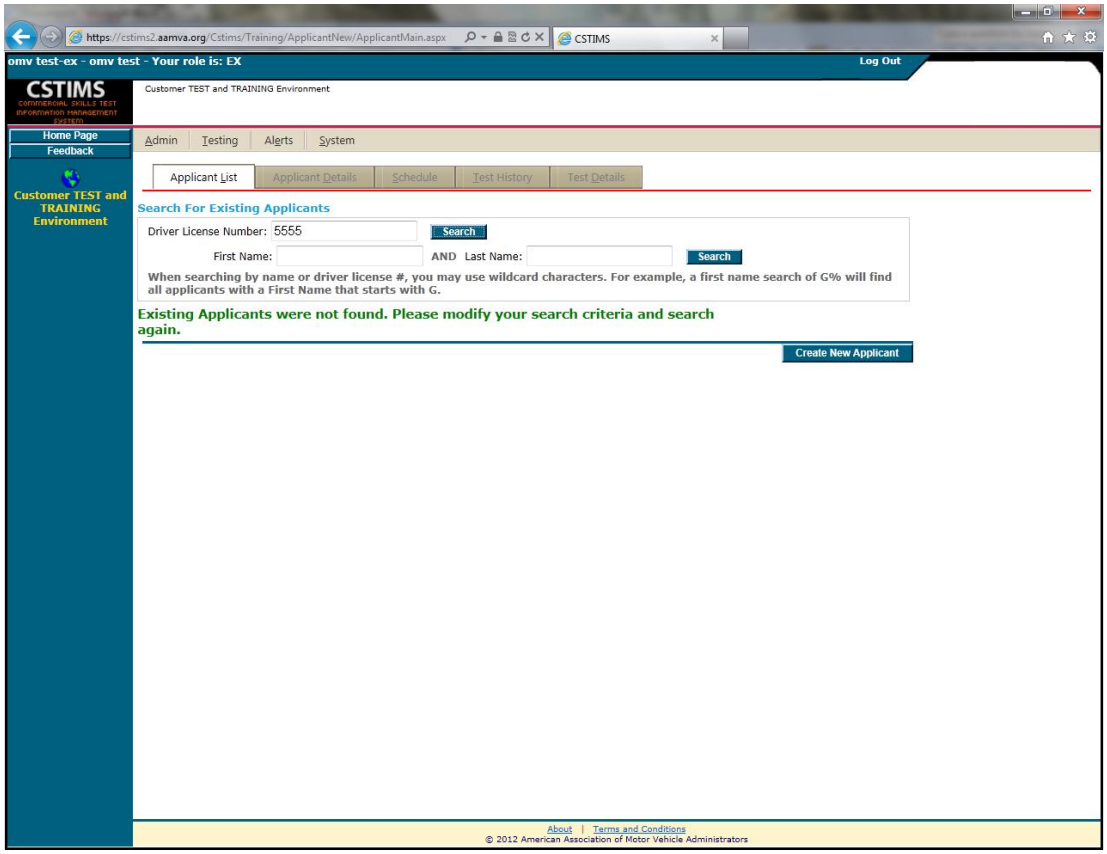


This brings you to your home page that shows the calendar view. You can look at your scheduled, completed, or cancelled tests.

Document ID: 0.7.1187.89615-000005 DMV00035467



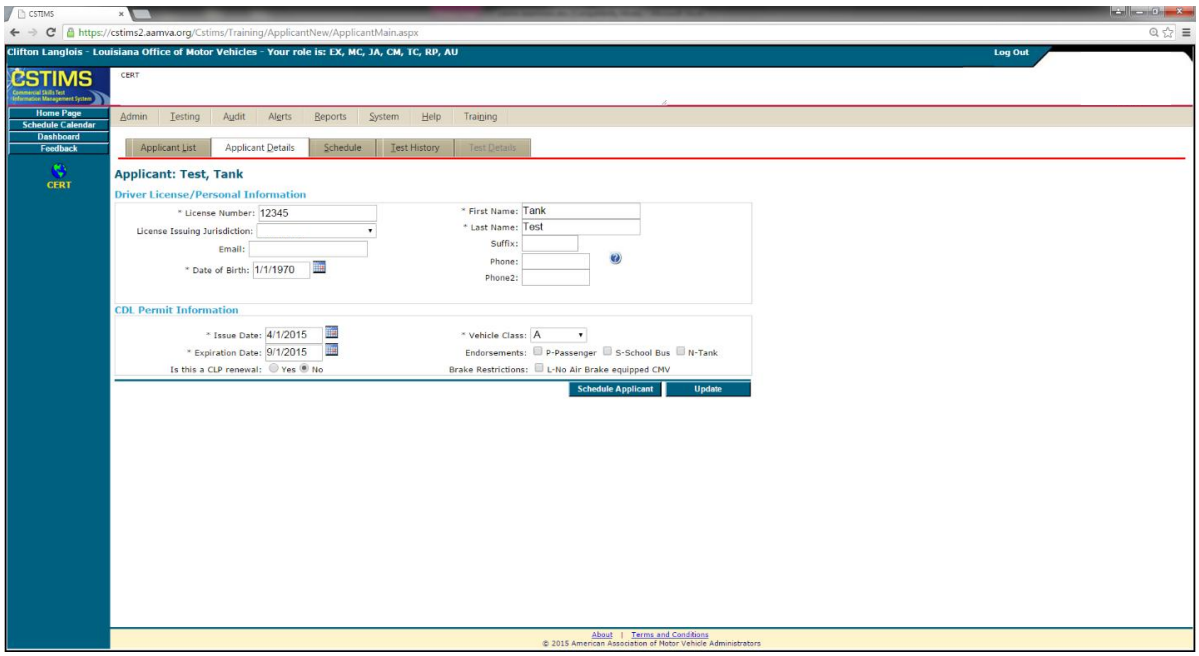
To add a test applicant, hover the mouse over the testing tab and select create.



Search for your applicant by entering the license number (with the beginning zeros). If that does not produce a result, delete the license number and type in the last name. Click on the appropriate search button.

*Remember to search both ways to avoid creating a duplicate individual

Document ID: 0.7.1187.89615-000005 DMV00035469

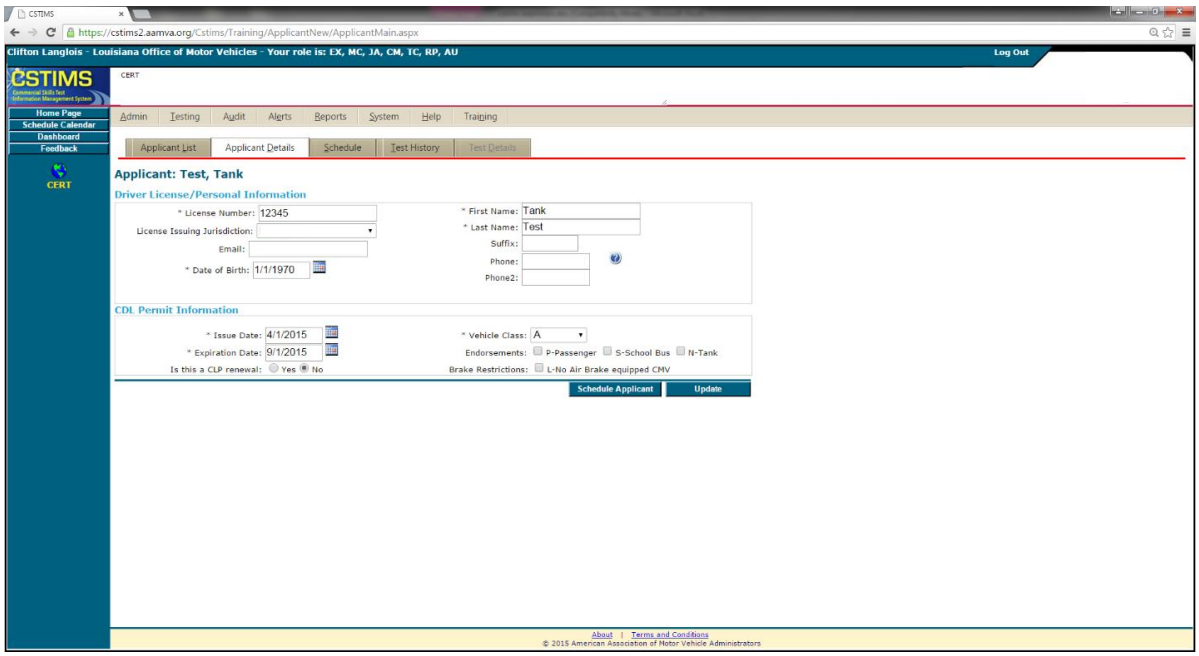


Document ID: 0.7.1187.89615-000005 DMV00035470

If you see your person, skip to page 12.

If you don't see your person, click on create new applicant.

Document ID: 0.7.1187.89615-000005 DMV00035471

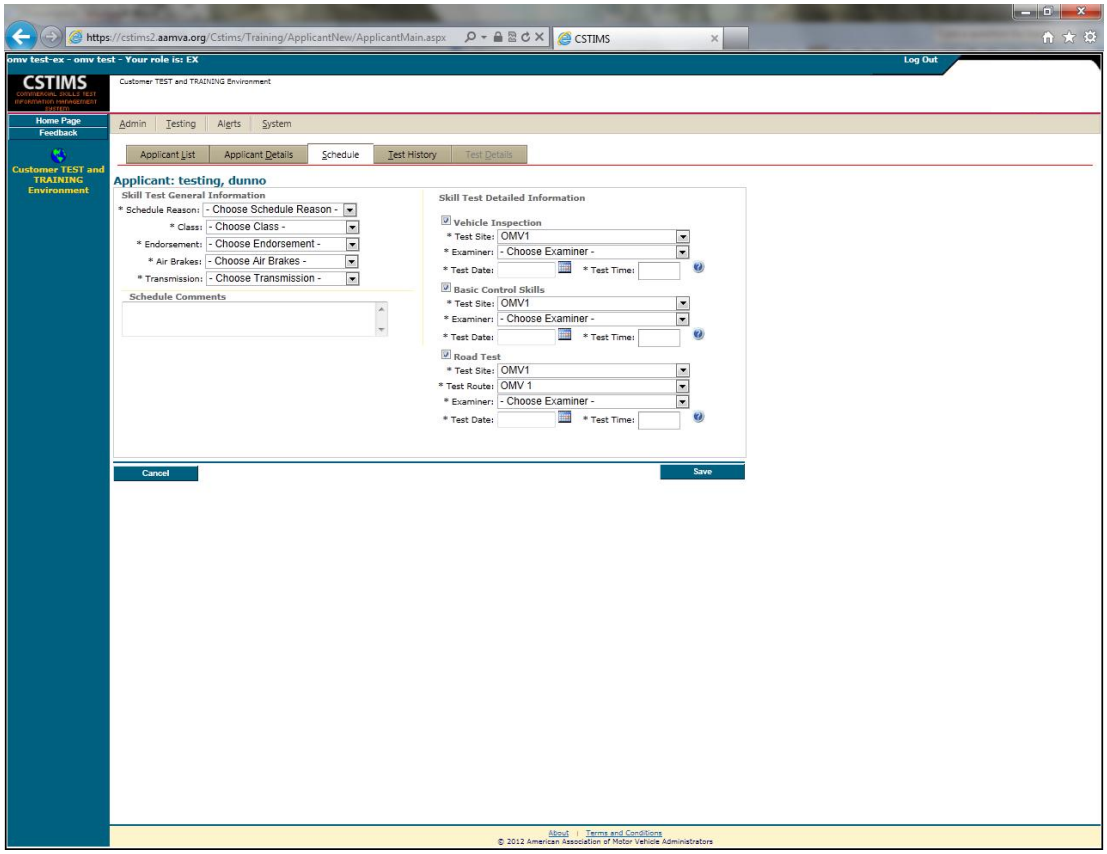


Enter the "driver license/personal" information from the CDL permit on this page.
Enter the "CLP" information from the CDL permit as well.
The e-mail address and phone numbers are optional.
If the applicant renewed the permit, you can click yes for "is this a clp renewal".

*If you select Yes, you must have a photocopy of **both** the old and new permit in your records – otherwise you cannot click yes.

When you are finished, click on create applicant.

Document ID: 0.7.1187.89615-000005 DMV00035472

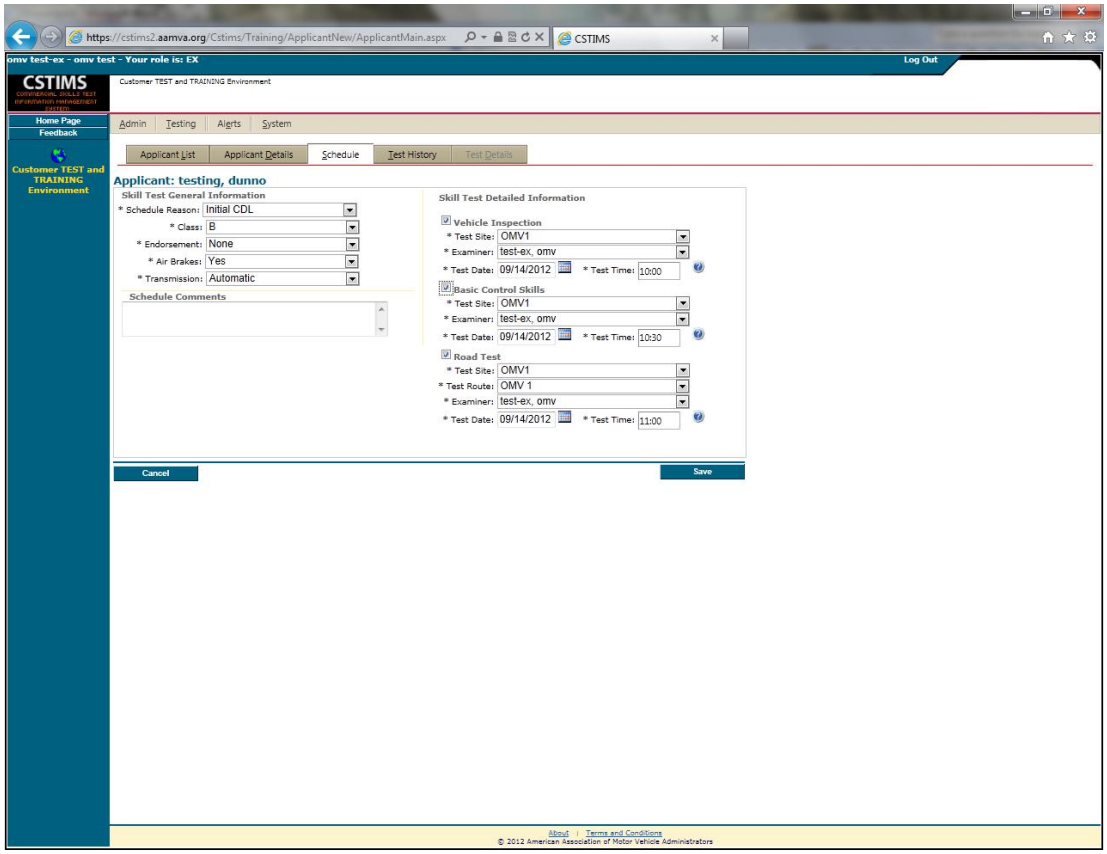


This screen shows information that is required.

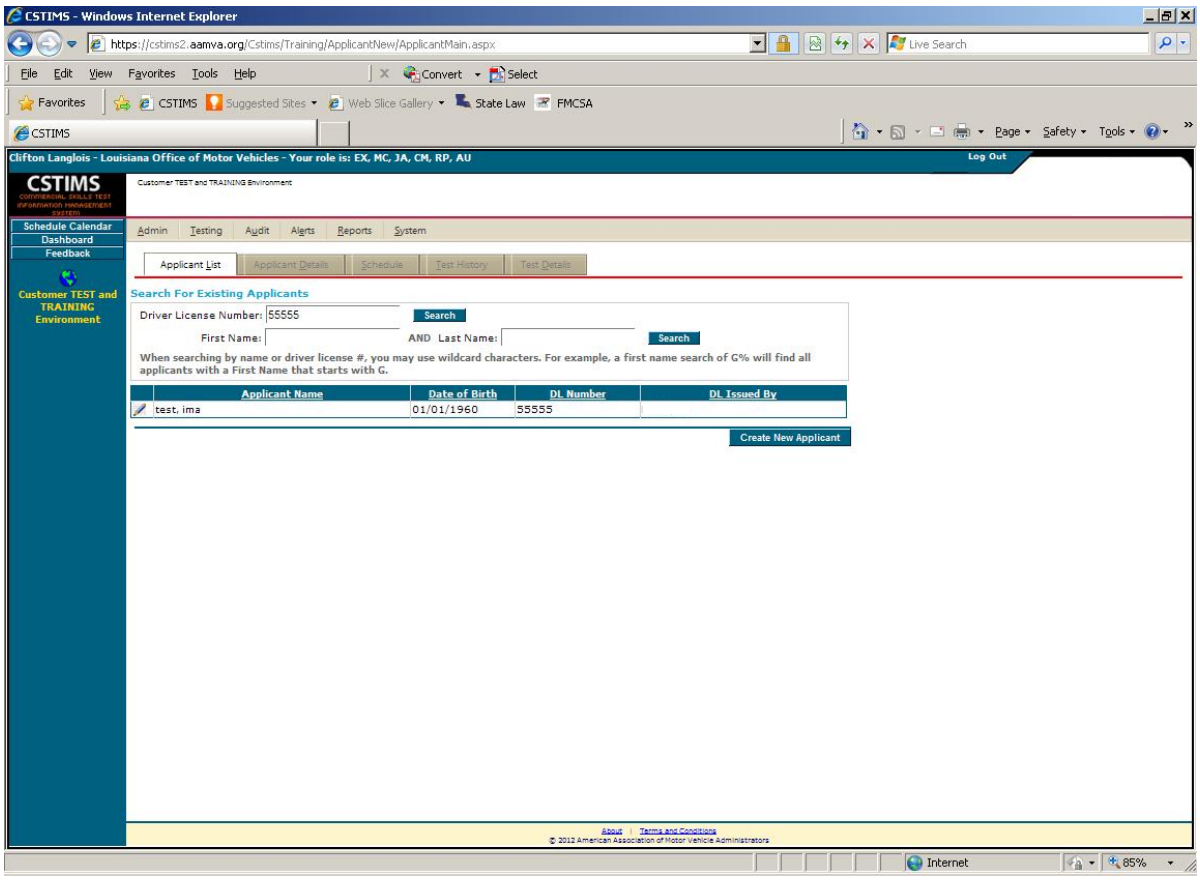
Although it is currently not a required field, click on the endorsements (if on the permit) and brake restriction (if the permit does not indicate “with air”).

Once finished, click on create applicant.

Once you have done that, another button appears where you can schedule the applicant. Press that button to continue.

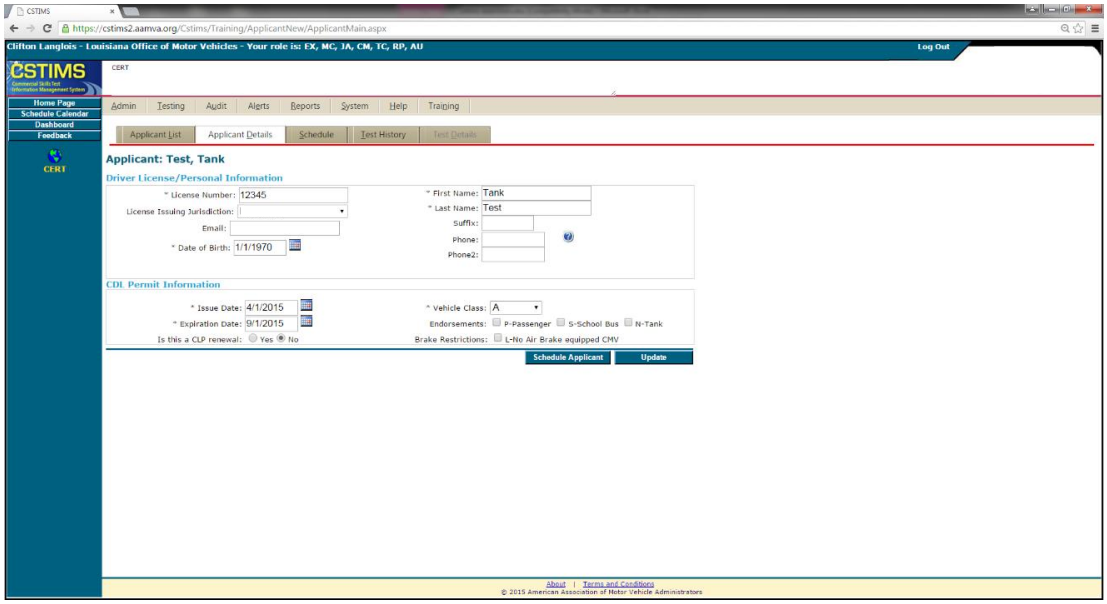


Document ID: 0.7.1187.89615-000005 DMV00035473



Enter the schedule reason (only use initial CDL, previous failure, or upgrade). Enter all other information on the left side of the screen.
To enter the information on the right side of the screen, after choosing the examiner, a schedule date and time must be entered for the vehicle inspection. The blue question mark will show you the format of the requested information. Either type in the date, or use the calendar function. The rest of the fields will populate in half hour increments. To finish, click save. All parts of the test are automatically scheduled.

*If you don't need a part of the test (banking within 14 days), uncheck those parts.



Document ID: 0.7.1187.89615-000005 DMV00035474

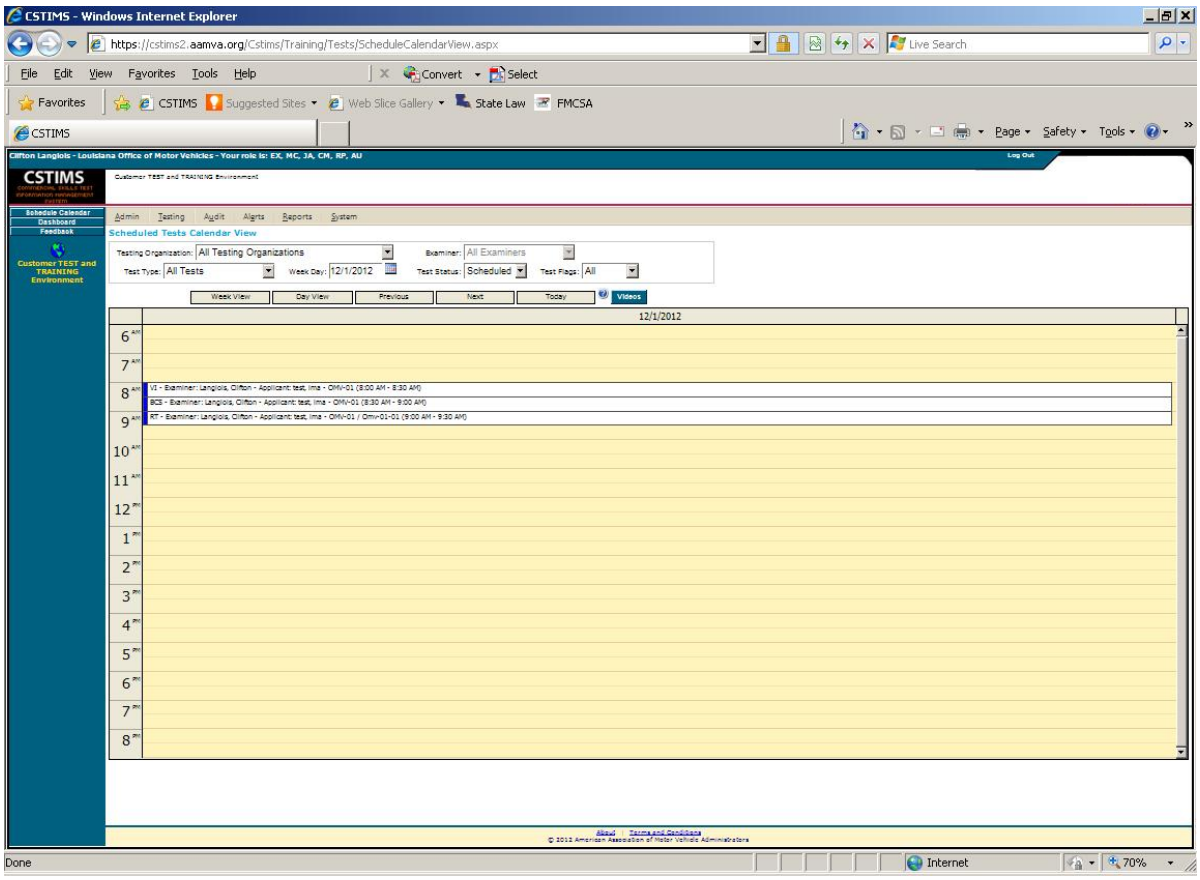
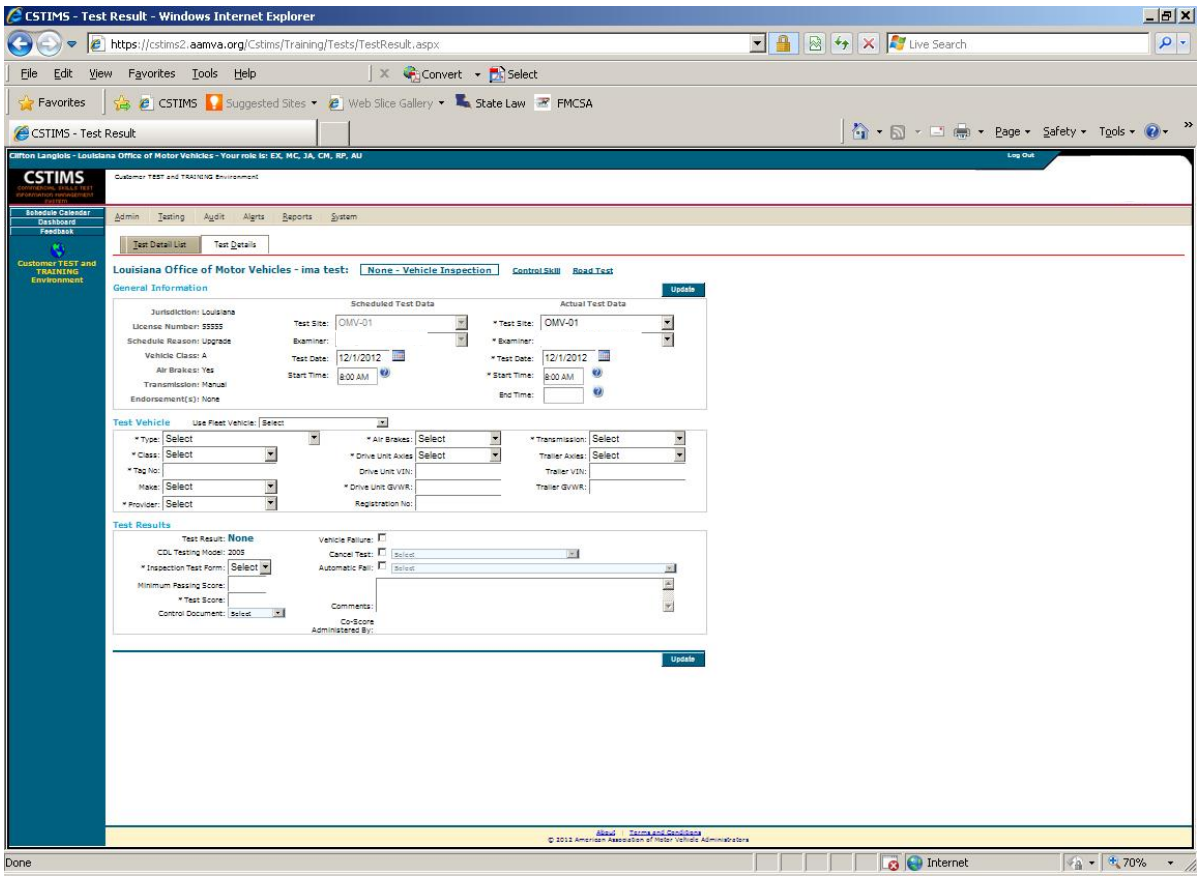
If your applicant is currently scheduled, this will show in the upper right corner. If the applicant is scheduled for a future date/time, do not schedule the applicant. If the schedule information shows a past date, the applicant should contact that examiner to cancel that test before you can schedule.
Enter all required information as described on page 10.

You can now go back to your home page and see the applicant on the calendar.



Document ID: 0.7.1187.89615-000005 DMV00035479



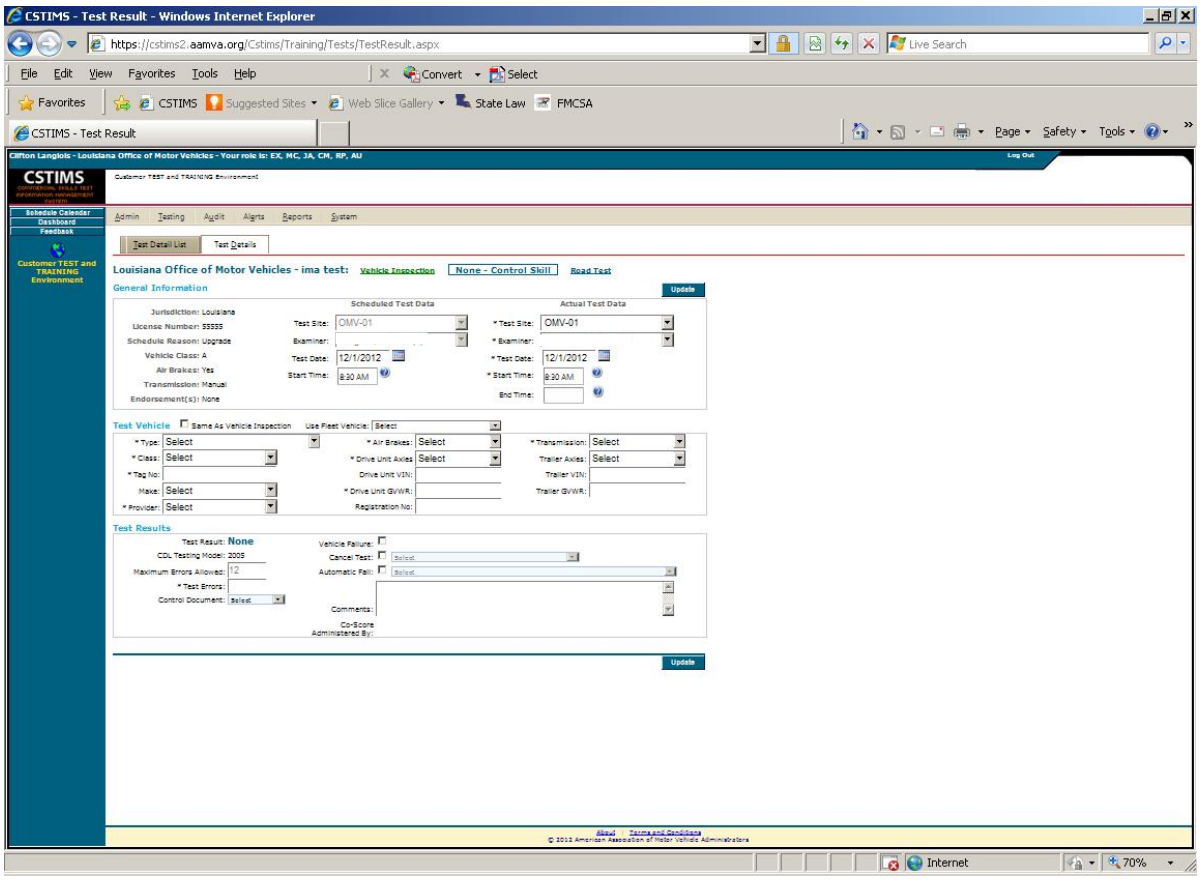
When the applicant finishes testing, you can right click on the vehicle inspection for your applicant and enter test results. If the test needed to be cancelled, you can click that option.

*It is very important to make sure you are clicking on the correct person. If necessary, click on the date at the top of the column to get a better view, as seen on the next page.

Document ID: 0.7.1187.89615-000005 DMV00035480

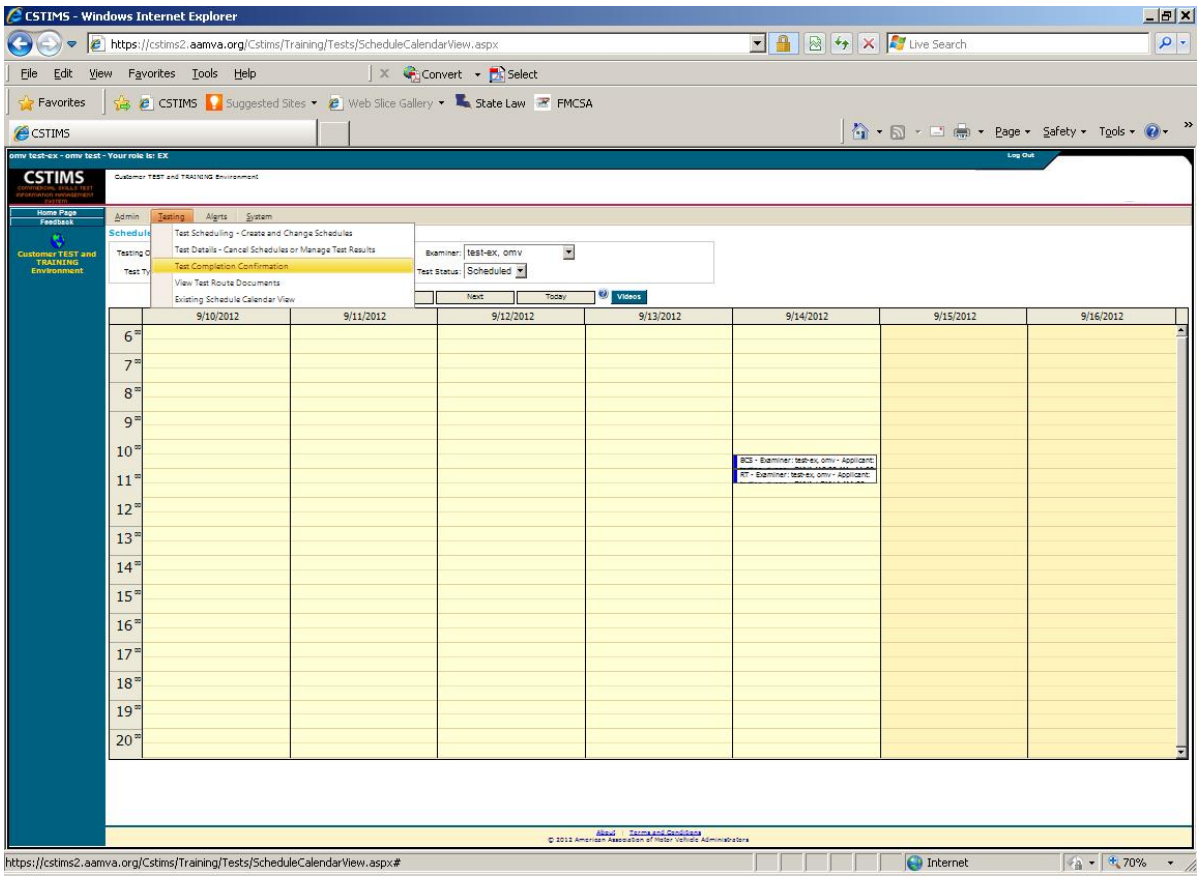
Document ID: 0.7.1187.89615-000005 DMV00035481

After selecting to enter test results, this screen appears. In the actual test data section, fill in each box (including start and end times from the score sheet). You may need to erase the start time and enter the correct start time. Provider means who supplied the vehicle.



For inspection test form, you will always select "full". If you have fleet vehicles set up, you can choose one of those and it will pre print the required information.

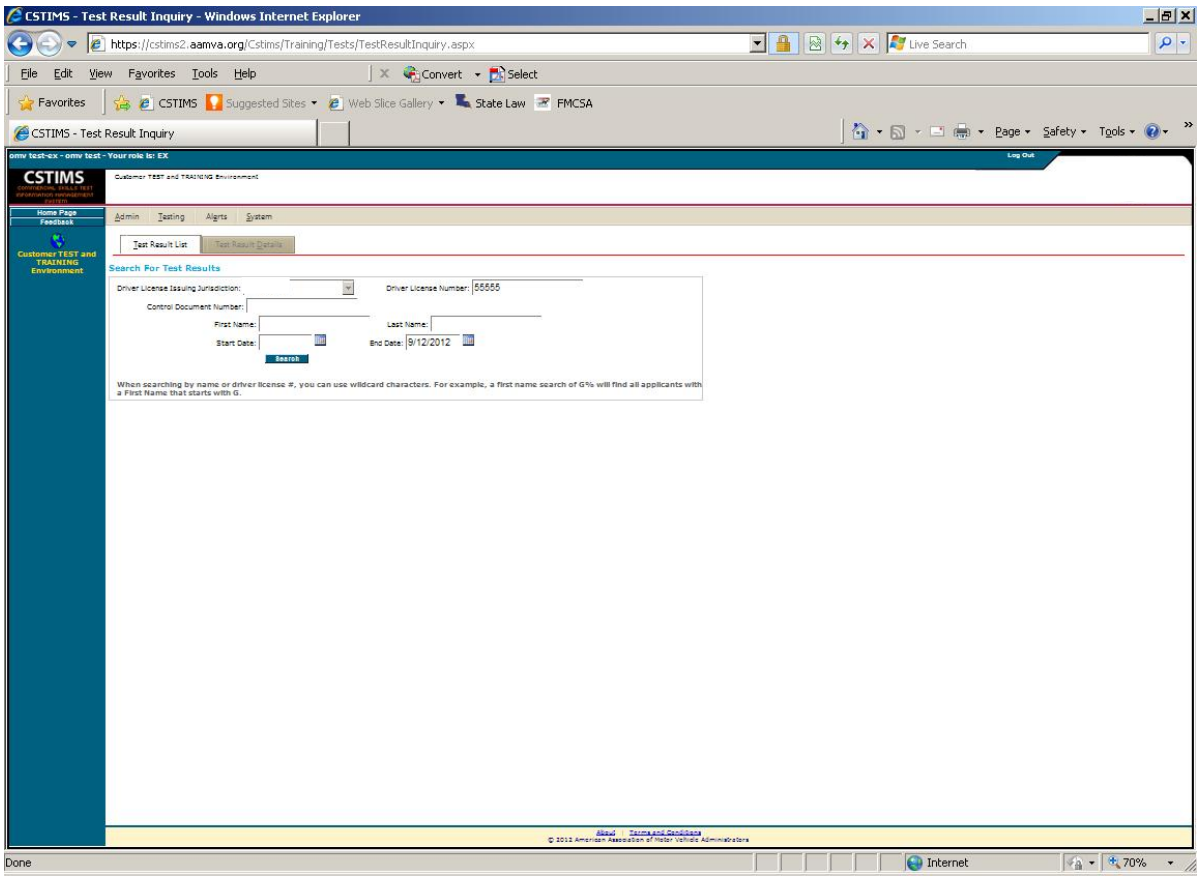
Leave the control document (certificates) section blank as these are no longer used.



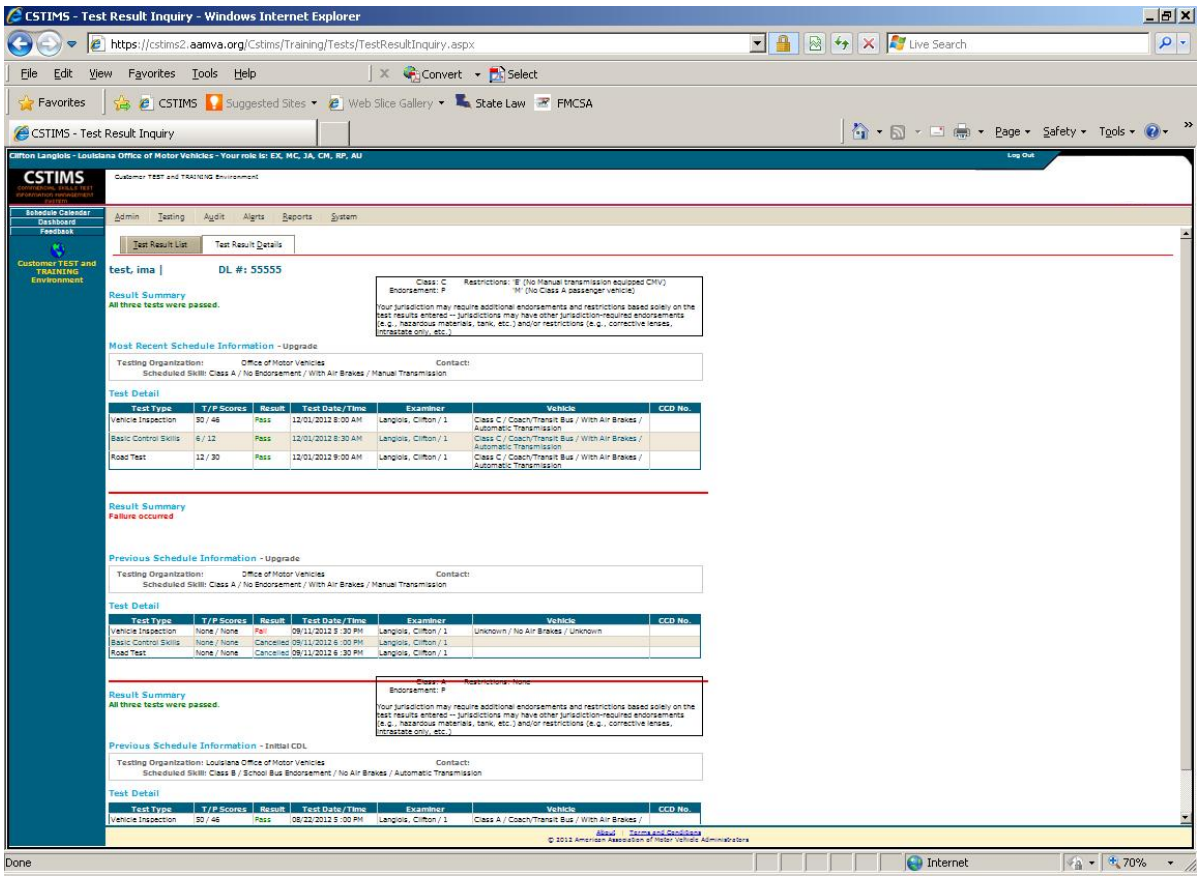
Use the comments section to make any notes about the test.

Once you have entered all information, click update.

Document ID: 0.7.1187.89615-000005 DMV00035482



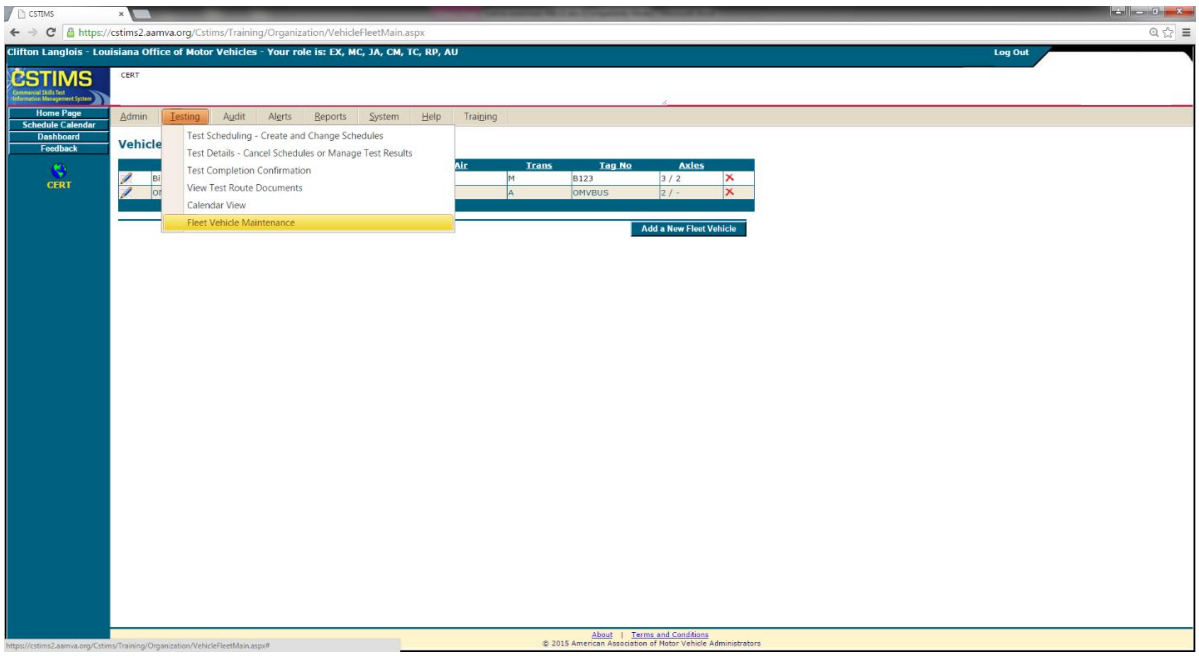
You can then click on “control skill” at the top to enter those scores. You can use the “same as vehicle inspection” option to fill in the vehicle information. When finished, click on the update button. You can then enter the same for the road test.



Once you have entered the test results, click on the test completion confirmation tab, under the testing heading. You can do this from the road test scores screen or the home page calendar view.

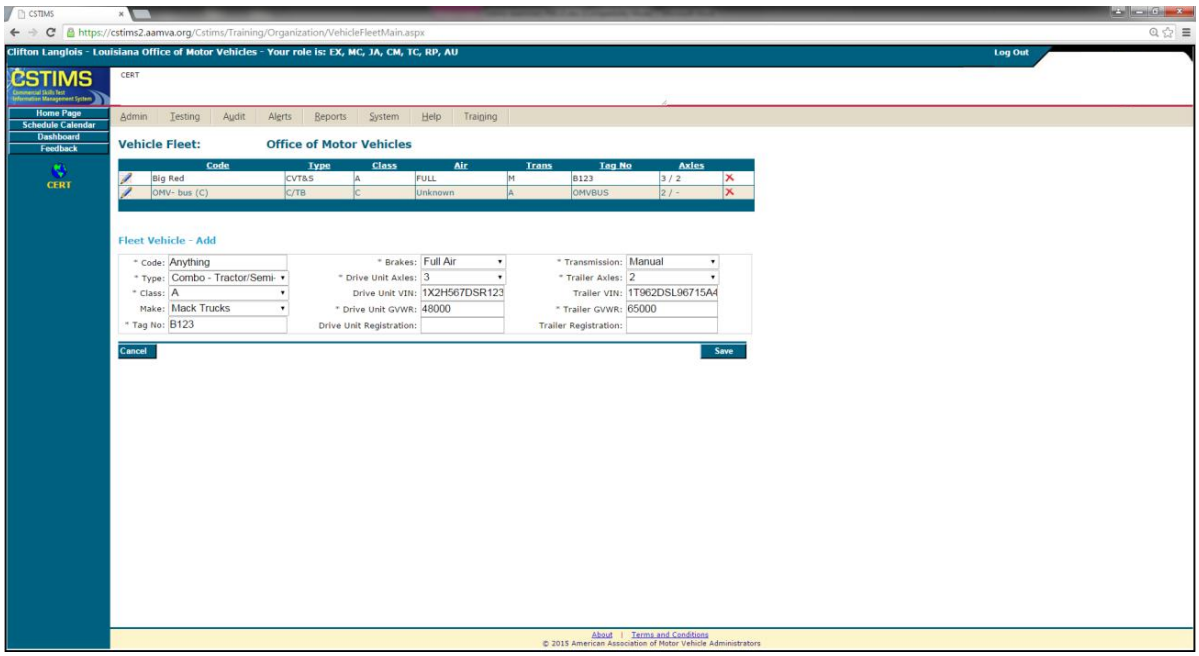
If you are unable to perform a test completion confirmation, using the license number you previously entered, stop and double check you didn't mistype (refer to page 5 on how to enter information in the search boxes). If you previously entered the wrong license number in, correct it (page 12 and 13). Perform another test completion confirmation.

Document ID: 0.7.1187.89615-000005 DMV00035484



Enter search criteria (license number with zeros or name) and click search.

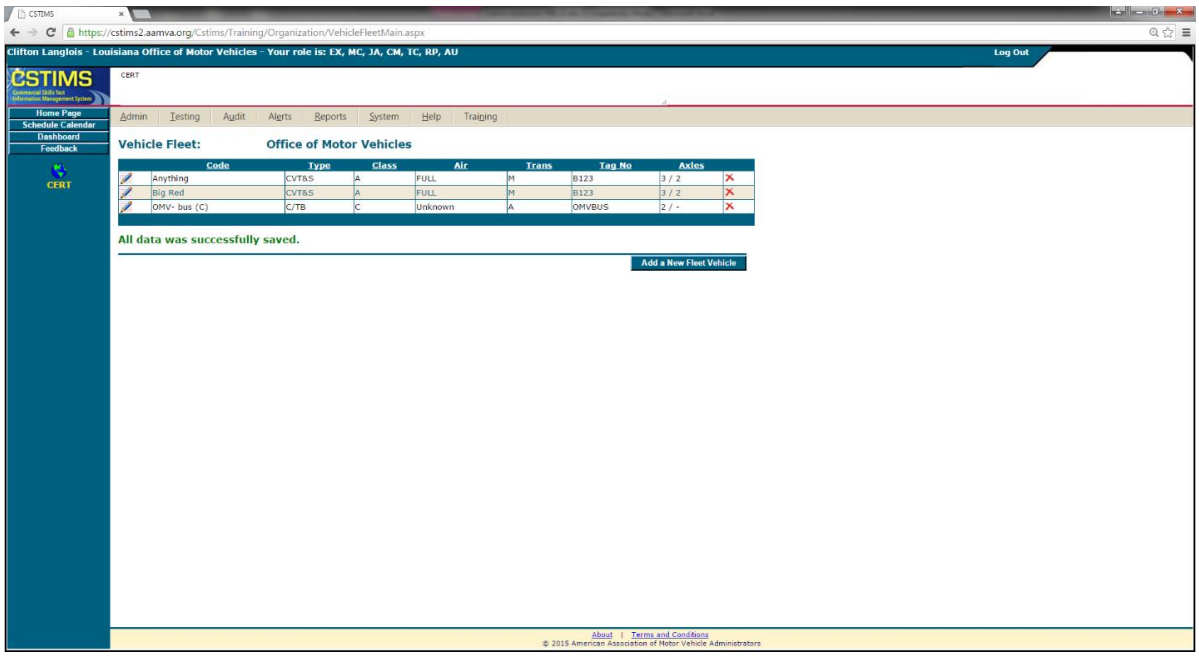
If the applicant passed all parts of the test, make sure all parts show pass (example at top of the page) before sending the applicant to the motor vehicles building.
If the applicant failed a part (example in the middle of the page) , he will need to be retested until he passes. Refer to page 7 above.



Document ID: 0.7.1187.89615-000005 DMV00035486

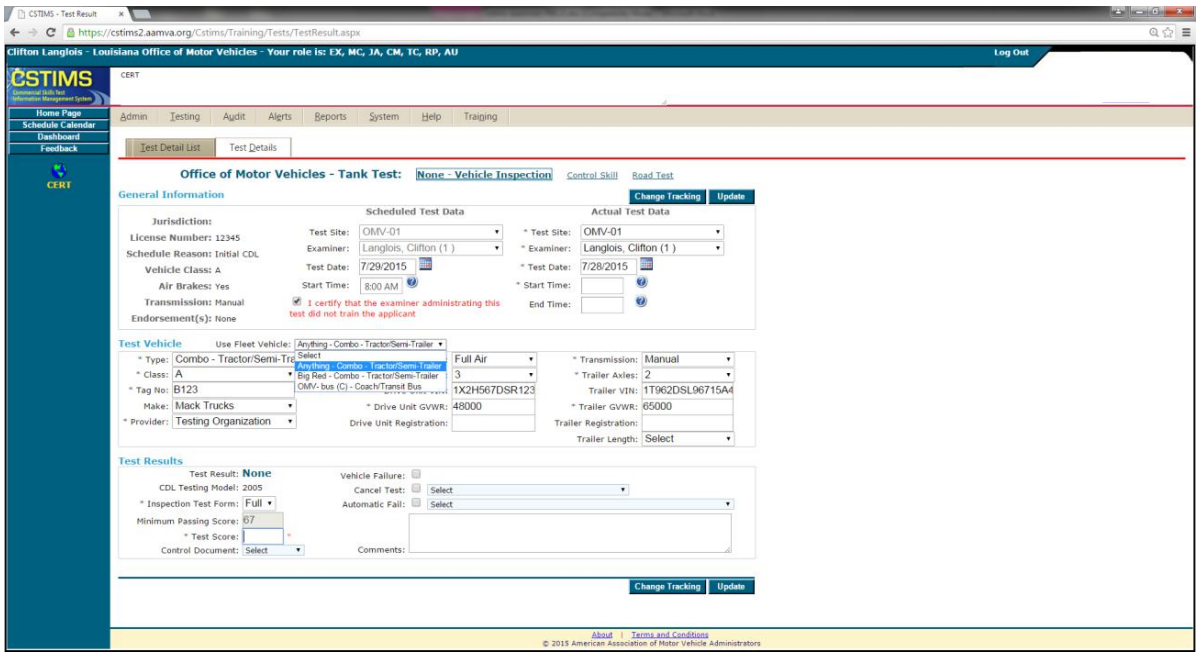
To add a fleet vehicle, you must have the "RP" status. If you do not, check with your manager if you want to add a fleet vehicle.

A fleet vehicle is a vehicle you own and use frequently for skills testing. Hover over the testing tab and select Fleet Vehicle Maintenance. Click on add new fleet vehicle.



Document ID: 0.7.1187.89615-000005 DMV00035487

Enter all information pertaining to the vehicle.
Code is your unique identifier for the vehicle and can be anything you want.
Double check all information for typing errors.



When finished, click save.

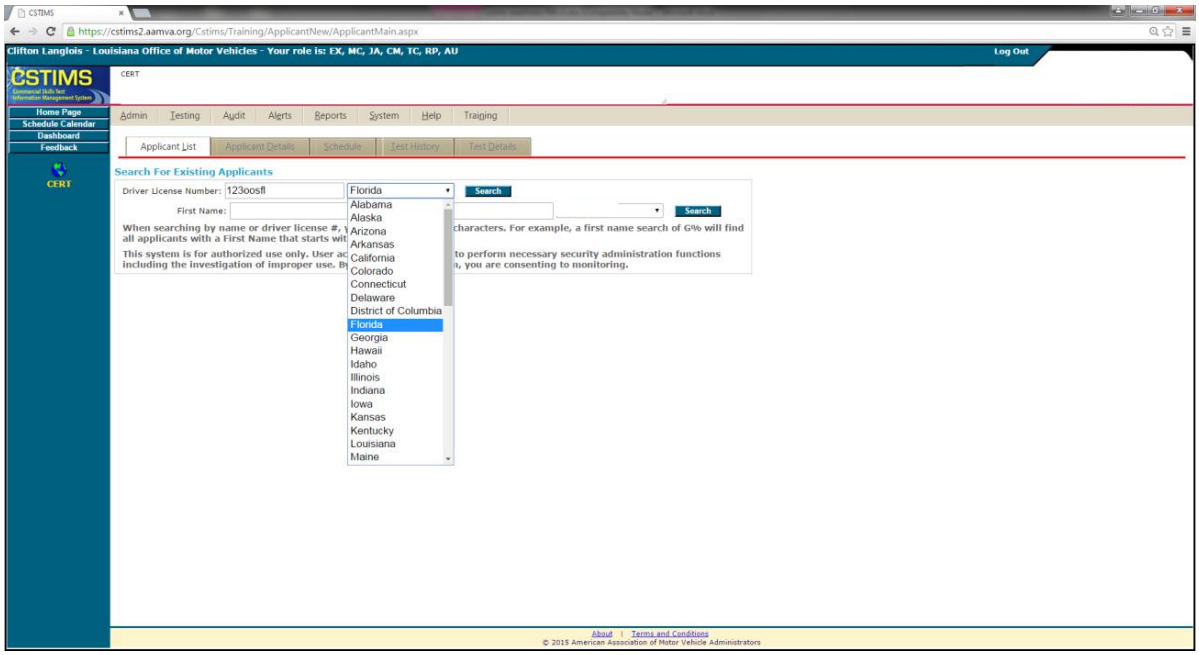
Document ID: 0.7.1187.89615-000005 DMV00035488

You will then see a status of your fleet vehicles. If you need to alter one of them, click on the pencil. If you no longer use one of the vehicles, you can remove them by clicking on the red "X" on that line.

Document ID: 0.7.1187.89615-000005 DMV00035489

To use the fleet vehicle, when entering test results, select the fleet vehicle dropdown menu and select the desired vehicle.

All the vehicle information will populate.

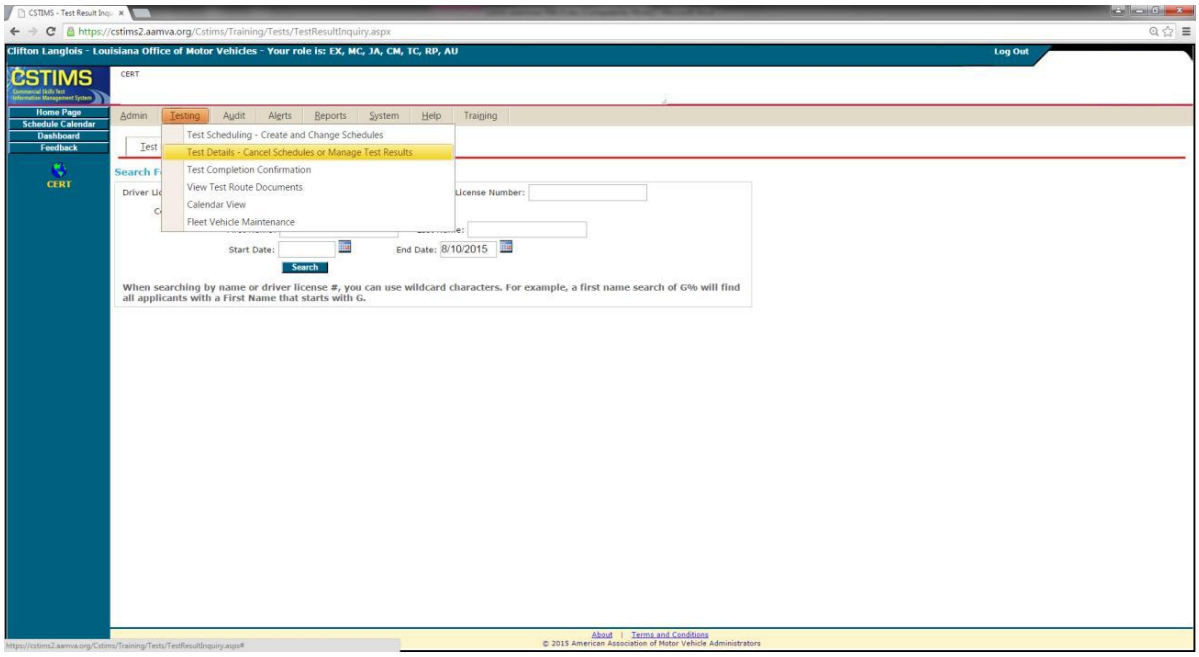


When XYZ Juridiction's office of Motor Vehicles allows Out of State Permits, use CSTIMS the following way.

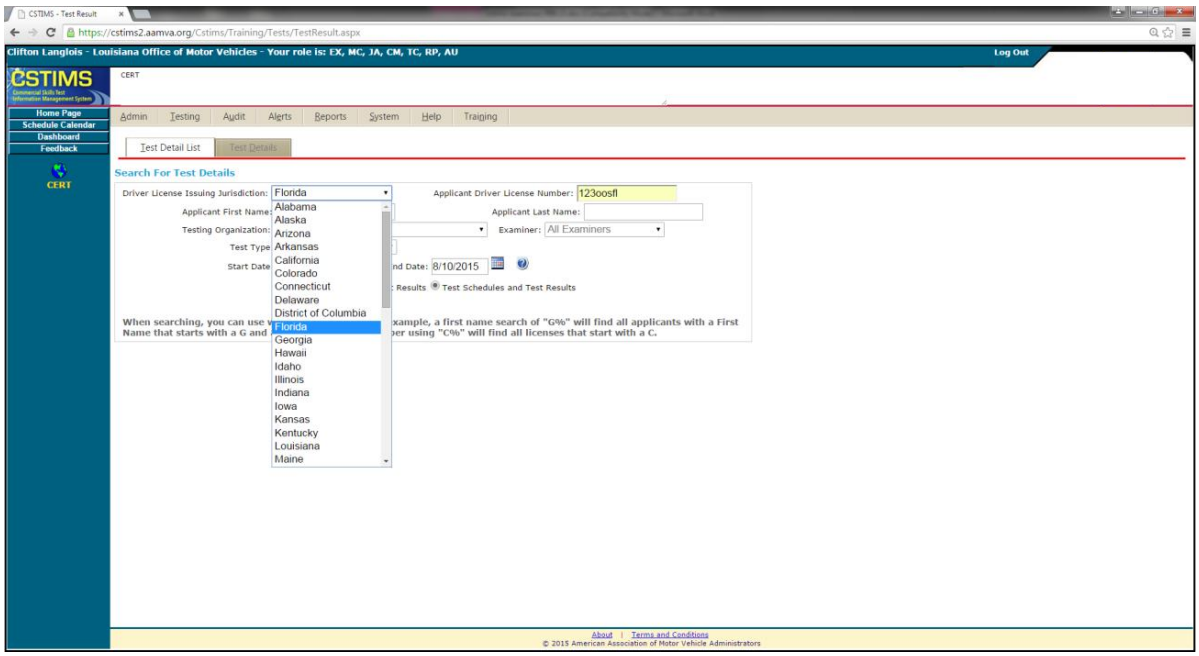
Start with the testing tab and select create new schedule.

The permit and driver's license must be from the same state. If it is not, reject the applicant.

Enter the out of state license number and select the state the permit and license comes from.

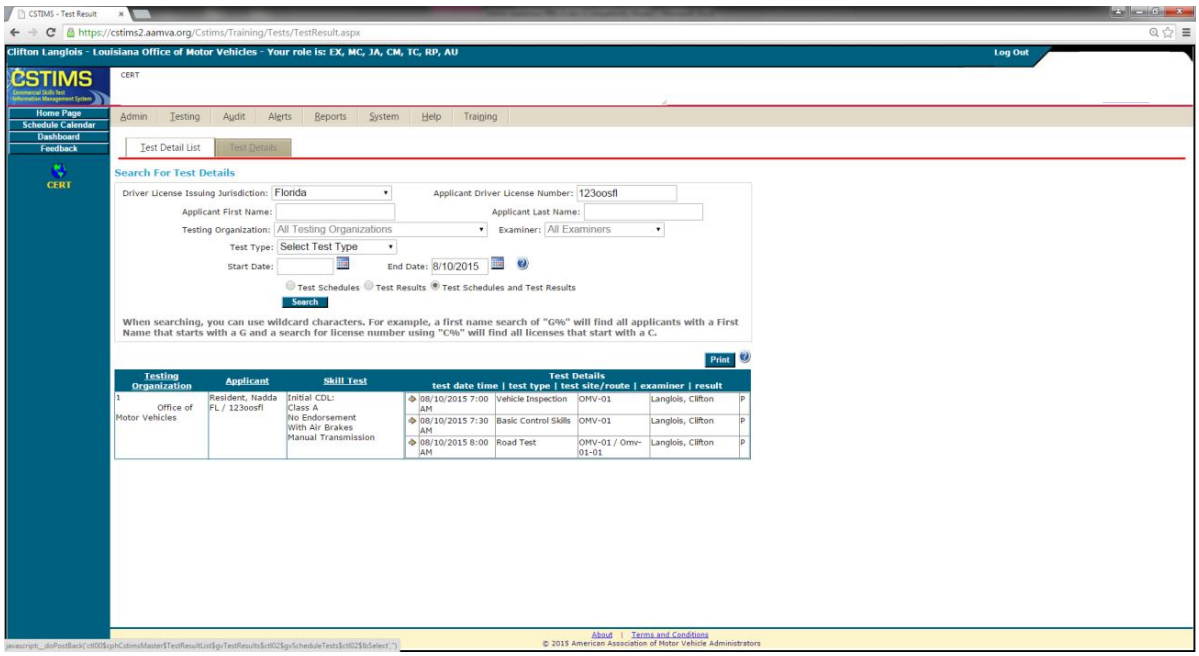


* It is very important to not make a typing mistake as you will not be able to see it later using a test completion confirmation.



Proceed as usual for scheduling the test and entering test results.

Document ID: 0.7.1187.89615-000005 DMV00035491



If you think you made a mistake when entering test results on an applicant, correct the mistake the following way:

Clicke on test details, manage test results.

Choose the state jurisdiction and enter the out of state license number. Change the search criteria from test schedules to test schedules and test results. Select search.

Confirm your applicant's name and choose the arrow next to the test you need to modify.

Make the corrections and select update.

Hello,

I will be sending the following attachments in separate emails.

1. CSTIMS cheat sheets that you can use when training the field examiners (in addition to the training slides on AAMVA website).
2. Examiner Training Manual we received from a Jurisdiction.
3. Score sheets – Please note that these are provided as samples.

This is the 1st set of the attachments.

Regards,
Vikas Jain | Ph: 703-908-5763 | vjain@aamva.org | 4401 Wilson Blvd, Suite 700 • Arlington, VA 22203 • Tel 703.522.4200 | www.aamva.org |

Hello,

I sent an email to you all regarding the following on 6/30. I got the below notification about the undelivered email. I was off yesterday. Maybe I will have to send multiple emails to send all the attachments. I will try to send these today.

1. CSTIMS cheat sheets that you can use when training the field examiners (in addition to the training slides on AAMVA website).
2. Examiner Training Manual we received from a Jurisdiction.
3. Score sheets – Please note that these are provided as samples.

Hello,

I will be sending the following attachments in separate emails.

1. CSTIMS cheat sheets that you can use when training the field examiners (in addition to the training slides on AAMVA website).
2. Examiner Training Manual we received from a Jurisdiction.
3. Score sheets – Please note that these are provided as samples.

This is the 1st set of the attachments.

Regards,
Vikas Jain | Ph: 703-908-5763 | vjain@aamva.org | 4401 Wilson Blvd, Suite 700 • Arlington, VA 22203 • Tel 703.522.4200 | www.aamva.org |

Hello,

I sent an email to you all regarding the following on 6/30. I got the below notification about the undelivered email. I was off yesterday. Maybe I will have to send multiple emails to send all the attachments. I will try to send these today.

1. CSTIMS cheat sheets that you can use when training the field examiners (in addition to the training slides on AAMVA website).
2. Examiner Training Manual we received from a Jurisdiction.
3. Score sheets – Please note that these are provided as samples.

Yes, at this point you would contact the state and find out they made a mistake. Please go ahead and send me your screenshots. Once I verify then we will move forward with TC009 where you will need to back out your transaction so they can correct.

Thanks,
Susan Creighton / 703.908.5893 office

I've completed the transaction. It resulted in an error that won't be avoided. This would be an example of where the NMVTIS menu would be used.

Subject: RE: NMVTIS AK Rewrite - TC008

This email comes from an external source, so remember, Think Before You Click!

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've passed the inquiry stage.

In general, a title mismatch is a manual stop. Thus the "if the clerk has reason to continue despite the mismatch."

Thank you,

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Thank you,

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've run the inquiry on TC008. The NMVTIS record shows AI000574328 rather than AI000574323 as reported on the "title".

Greetings!

I will be out of the office July 3rd through July 20th. I will be back in the office July 21st.

If you need immediate assistance during my absense, please contact Rey Caparas at 907-465-4361.

Thank you and have a great day!

Gary,

The AKA DOB is there now but the license issue date is missing now, it was present before.

Thank you

Ok, the status is good now, the 1 little thing I noticed was that there were 3 AKA Names but only 2 AKA DOB (the 3rd AKA DOB is empty). Could you please add that?

Thank you

It was necessary to update this driver with a basic DL expiring the permit. The non-commercial license was set to SUSPEND as a result of the withdrawal.

It was necessary for me to delete and re-add the pointer for Driver B.

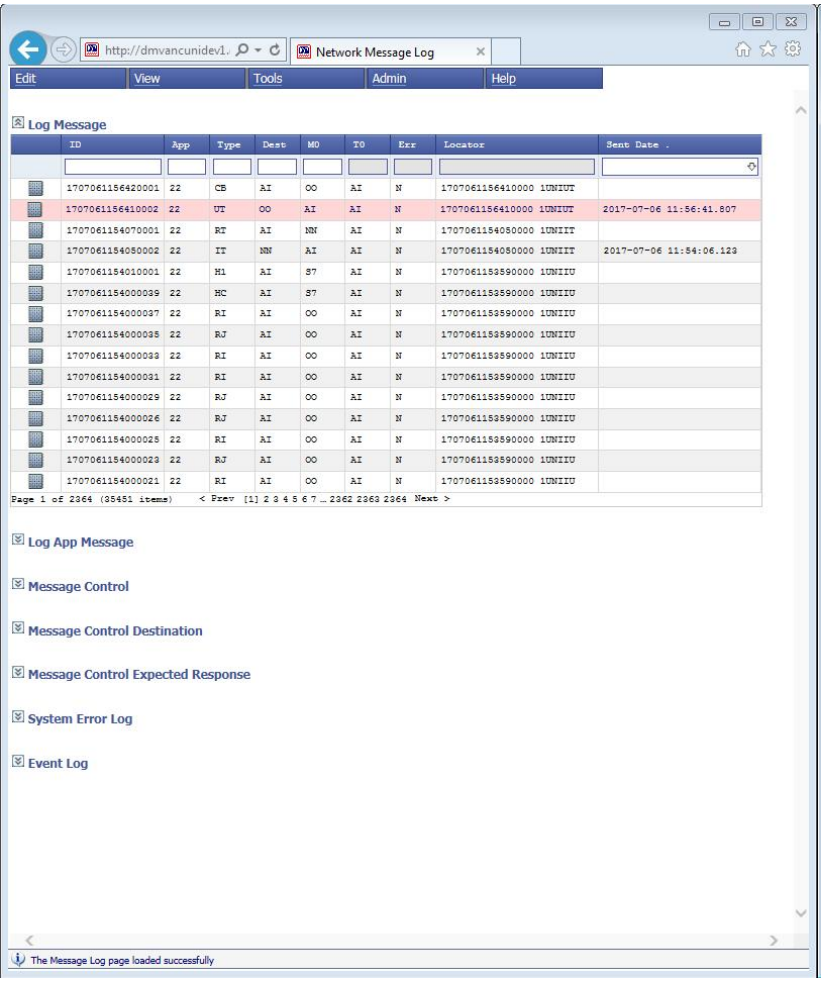
Subject: NMVTIS AK Rewrite - TC008

Susan,

I've run the inquiry on TC008. The NMVTIS record shows AI000574328 rather than AI000574323 as reported on the "title".



Thank you,

Yes, at this point you would contact the state and find out they made a mistake. Please go ahead and send me your screenshots. Once I verify then we will move forward with TC009 where you will need to back out your transaction so they can correct.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

This email comes from an external source, so remember, Think Before You Click!

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've passed the inquiry stage.

In general, a title mismatch is a manual stop. Thus the "if the clerk has reason to continue despite the mismatch."

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've passed the inquiry stage.

In general, a title mismatch is a manual stop. Thus the "if the clerk has reason to continue despite the mismatch."

Thank you,

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Thank you,

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Attachments: TC009 Help Desk - CSOT Undo.PNG

Hello Susan,

I've completed the CSOT undo for TC009 using the help desk. Please find a screenshot attached.

Also, I incorrectly marked TC010 as T. Your initial H designation is correct.

Thank you,

Yes, at this point you would contact the state and find out they made a mistake. Please go ahead and send me your screenshots. Once I verify then we will move forward with TC009 where you will need to back out your transaction so they can correct.

Thanks,
Susan Creighton / 703.908.5893 office

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've added the title with the following information:

20170605	SCA666D53HU102664	**HOND**	**2017**	7277387	40183794

The date being yesterday's is somewhat intentional. I forgot to close to close out my drawer from yesterday and open a new one. I'll do that now for any further test cases today. I've also attached my screenshot.

Would you please send me back a copy of your current spreadsheet?

Thank you,

Hi Dillon,

Yes, you were supposed to receive a result from S7 as the test case indicates they used the wrong MCO when they titled. I have performed the correction for S7 so you can proceed.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

I promised to let you know about test case 30. I changed the wording as below: The VIN should come from the chassis which is first stage and the make and model year from the second stage. The data in the old fields is from first stage.

030	M - 02	A vehicle in your state is re-titled, odometer reading is UNKNOWN. The vehicle has been reconstructed. The VIN is being used from the first stage vehicle and Make/Model Year from the body (second stage). The VIN already exists in NMVTIS with different Make / Mod Yr (Old Veh Info in spreadsheet is from first stage veh).	Title	In-state	Salvage Certificate	AISTRUCTRTST01M02	PONT	2

Sorry for any confusion.

Thanks,
Susan Creighton / 703.908.5893 office

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have

Document ID: 0.7.1187.57976 DMV00035635

the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

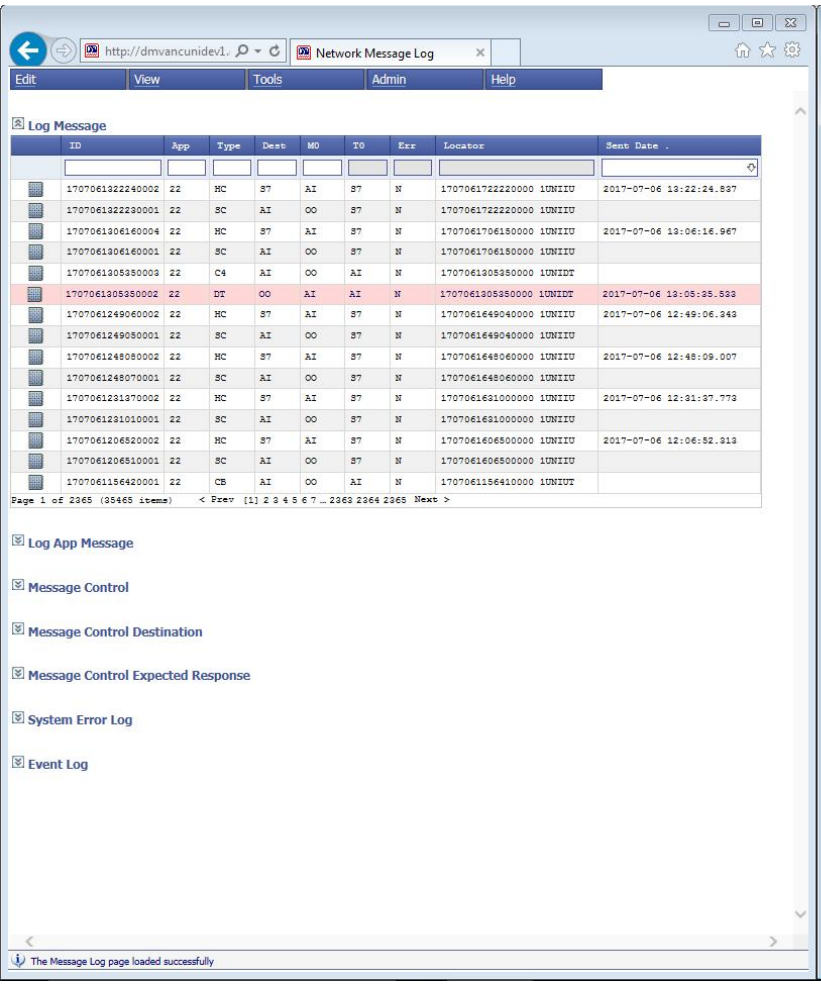
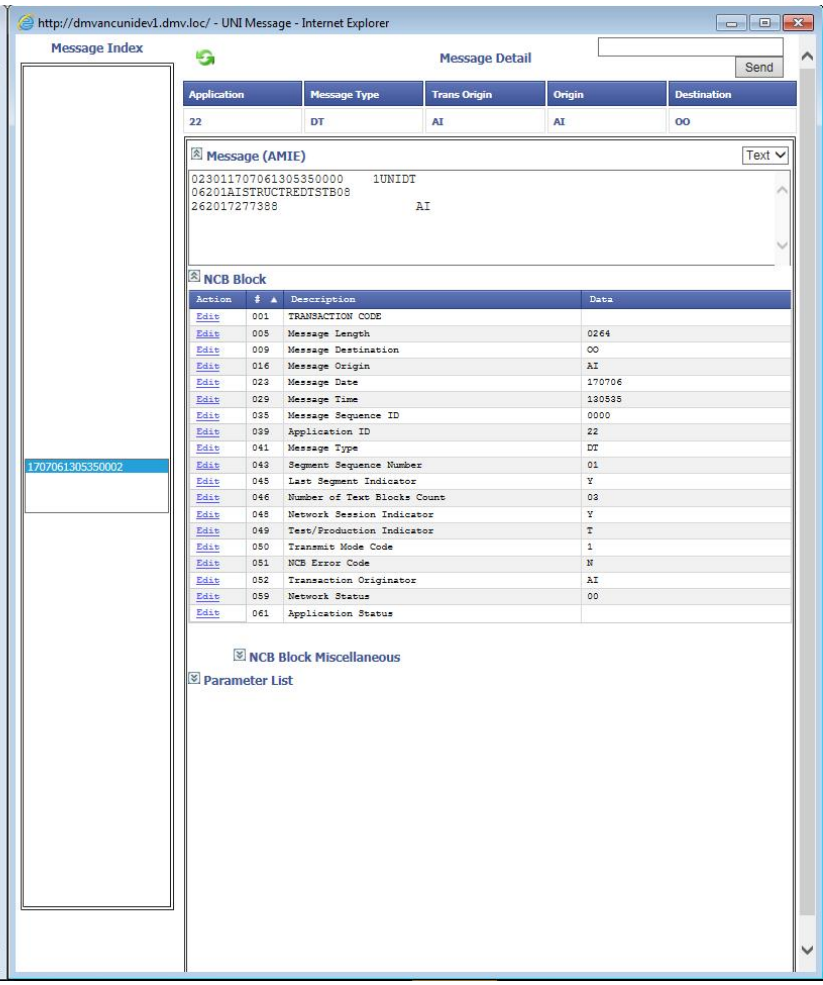
Subject: NMVTIS AK Rewrite - TC008



Susan,



I've run the inquiry on TC008. The NMVTIS record shows AI000574328 rather than AI000574323 as reported on the "title".

Thank you,

Hello Susan,

I've completed the CSOT undo for TC009 using the help desk. Please find a screenshot attached.

Also, I incorrectly marked TC010 as T. Your initial H designation is correct.

Thank you,

Yes, at this point you would contact the state and find out they made a mistake. Please go ahead and send me your screenshots. Once I verify then we will move forward with TC009 where you will need to back out your transaction so they can correct.

Thanks,
Susan Creighton / 703.908.5893 office

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've passed the inquiry stage.

In general, a title mismatch is a manual stop. Thus the "if the clerk has reason to continue despite the mismatch."

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

TC006 - The Make on the spreadsheet and the Make you submitted in the UT do not match. Also, there is a brand on the HC that should not be there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC006 and TC007

Hello Susan,

I restored the record for AISTRUCTREDTSTB06 to its original state using Brand Undo and CSOT Undo.

Please find attached a screenshot for the latest execution of TC006.

Thank you,

This is the one that we discussed today. For this one I will add a new test for you to add the salvage brand which will be TC 006A and then test case 7 will use the brand you have mapped for after it has been repaired. You mentioned that you forgot to add the brand which was forwarded from another state for TC 006, when you did you sent a brand 10 add to us. When you are forwarding brands that have already been reported to NMVTIS you can add to your system and title but you should not send another brand to NMVTIS as that will appear as a different branding event. So let's start over with TC 006. Also, I will send an updated Test Case Plan today along with the status.

Test Case	Assoc Test Cases	Test Scenario
006	B - 06 B - 06A B - 07 K - 03	A vehicle moves into your state from NMVTIS batch state S9 and is titled.

006A	B - 06 B - 06A B - 07 K - 03	The vehicle in TC # 006 has been declared salvage by the insurance company.
007	B - 06 B - 06A B - 07 K - 03	Vehicle that was titled in TC # 006A is being sold to a new owner and has been repaired.
027	B - 06 B - 06A B - 07 K - 03	Owner wants a duplicate/replacement title for a vehicle in TC # 007 that had brands associated with it.

Thanks,
Susan Creighton / 703.908.5893 office

Hi,

I just want to make sure I understand. This test case indicates that the vehicle is being sold to a new owner and there is a branding event of salvage (junk in your case). So are you saying that you would not allow the new owner to title the vehicle until it is repaired?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

As per Debra's response below, I've added the 11 brand for TC007 but Alaska does not issue a new title in this scenario. Unless the vehicle is once again reconstructed, it cannot be retitled.

Thank you,

Dillon,
In scenario A –
1/1/2015 is correct
1/1/2016 the model remains REC indefinitely and is never changed - after the vehicle is repaired and inspected it is retitled once again as a reconstructed vehicle to reflect a new owner of record.

In Scenario B, each step is correct – the model will not change from REC once it is recorded as REC on the first REC title issued.

Let me know if you have questions –

Thank you,

Subject: NMVTIS AK Rewrite - TC006 and TC007

Hello Susan & Debra,

Preface: For the purpose of discussion, Alaska does not recognize brand code 8 "junk". Alaska uses the description "**junked**" in place of "salvaged" and any uses of either are synonymous for brand code 11.

For TC007 (AISTRUCTREDTSTB06), I noticed a **reconstructed** brand exists from the previous state reported in 2015 when attempting to issue a new title for the sale of the vehicle titled in TC006. It seems I may have originally missed this and performed TC006 incorrectly as I should've branded that vehicle as **reconstructed** during the titling process.

Some additional information I obtained from Debra during a recent telephone conversation:

1. When a vehicle titled in Alaska is reported as **junked**, a brand is added to the existing pointer. A new title is not issued. Titles are never issued for vehicle presently considered **junked**.

2. **Reconstructed** is the only brand which will ever physically appear on a printed title. A **reconstructed** brand is issued when titling a vehicle that is branded as **reconstructed** in another state, or when a **junked** vehicle has met criteria to be presently considered **reconstructed**.

These details along with the discontinued behavior of replacing brands clarify the discrepancies with the answers originally provided in the questionnaires.

However, I'm unsure of the expected behavior when a vehicle is reported **junked** after being **reconstructed**, which appears to be what TC007 is testing.

Debra, could you please clarify/confirm the outcomes of the following sequences of events:

Scenario A.) An out-of-state vehicle with a **reconstructed** brand is titled in Alaska, then later is reported **junked** and sold to another Alaskan.

Date	Event	Title Issue (Yes/No)	Brands Issued (REC/Junked)	Additional
01/01/2015	An out-of-state reconstructed vehicle is titled in Alaska	Yes	Reconstructed	N/A
01/01/2016	The vehicle is reported junked and sold to a new Alaskan owner	No	Junked	Add J status message. Does the model remain REC or return to original? Perform no title issued to change owner?

Scenario B.) A vehicle currently titled in Alaska becomes junk, then is reconstructed and retitled, then later becomes junk again.

Date	Event	Title Issue (Yes/No)	Brands Issued (REC/Junked)	Additional
01/01/2014	A new vehicle is titled in Alaska	Yes	N/A	N/A

Document ID: 0.7.1187.57978 DMV00035656

01/01/2015	The vehicle is reported junked	No	Junked	Add J status message.
01/01/2016	The vehicle is reconstructed and meets the criteria to be titled as such	Yes	Reconstructed	Remove J status message, changing model to REC.
01/01/2017	The vehicle is once again reported junked	No	Junked	Add J status message. Does the model remain REC or return to original?

Hi Dillon,

When changing the VIN for a vehicle moving into state you need to use the UT (CSOT) transaction and fill the Old VIN field with the original VIN and the New VIN field with the new VIN. This will cause the old title record to move to the

history of the new title record. If you send a UA with the new information the old title will remain on NMVTIS in current and look like it is a negotiable title.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

I promised to let you know about test case 30. I changed the wording as below: The VIN should come from the chassis which is first stage and the make and model year from the second stage. The data in the old fields is from first stage.

030	M - 02	A vehicle in your state is re-titled, odometer reading is UNKNOWN. The vehicle has been reconstructed. The VIN is being used from the first stage vehicle and Make/Model Year from the body (second stage). The VIN already exists in NMVTIS with different Make / Mod Yr (Old Veh Info in spreadsheet is from first stage veh).	Title	In-state	Salvage Certificate	AISTRUCTRTST01M02	PONT	2

Sorry for any confusion.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: NMVTIS Planned Outage for Rhode Island Implementation - Reminder

NMVTIS Working Group:

The NMVTIS VIN Pointer and Brand Central Site database and State Web Interface (SWI) will be unavailable from July 9, 2017 8:00 AM EST to July 10, 2017 6:00 AM EST. The reason for this planned outage is to perform the initial load of Rhode Island's title and brand data. AAMVA is pleased to announce that Rhode Island will be providing daily batch updates to NMVTIS starting after the initial load is completed and perform batch inquiries.

States performing BATCH Updates and/or Inquiries:

Due to this planned outage, there will be a delay in batch processing on July 9, 2017 and your batch update and batch inquiry files will be processed after Rhode Island's initial load is completed.

States performing ONLINE or BATCH Updates:
The Initial Load process will create **Notification Messages**. These Notification Messages will be created in batch N* message files for both Online and Batch states. The N* message files, when created will be placed in the state folder on the AAMVA SFTP server. AAMVA will send a notification when the batch N* message files are ready for you to retrieve.

The AAMVA team remains dedicated to providing quality services that meet the critical business needs of our customers, including providing advance notice of all planned outages. If you have any questions or concerns, please contact the AAMVA Operations Department at 1-888-AAMVA80 option 1 or helpdesk@aamva.org.

Subject: RE: AK NMVTIS Testing - TC 016

I did perform the IU manually as well as the undo. The title existing was a mistake on my part and should not have been issued as Alaska does not title snow vehicles. Attempting to title a snow vehicle currently results in a notification/redirect to register the vehicle instead.

Hi Dillon,

For TC 016 we should not receive an inquiry nor should we receive a Title Undo. Because this vehicle is a non-NMVTIS type of vehicle when you title it your system should determine that it is a vehicle that should not be sent to NMVTIS nor inquired on prior to the point where you send an inquiry/update. There should not be any traffic on NMVTIS for non-NMVTIS type vehicles. I see the inquiry was sent after the title undo so you may have done that manually…

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - TC 014

Hello Susan,

Here are a few more test cases:

TC015 – Successful In-State Change
TC016 – Snow Vehicles can only be registered, not titled. I've updated the spreadsheet and performed a title undo to reflect this.
TC019 – Theft Response
TC020 – Theft Response

For TC018, I'm not finding anything in our type tables or the spreadsheet correlating to a "Commercial Trailer".

I'll be doing bug fixes and more first/single stage tests tomorrow and Monday while you're out.

Hello Susan,

I've attached screenshots for TC002, 006, 011, 013, and 014, as well as my updated spreadsheet.

I encountered a "TITLE NOT ON FILE" warning on the R3 returned in response to the IU issued for TC011. The corresponding screenshot includes a snippet that shows this warning being present in the UI. I did not continue with the titling process for this test case.

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've passed the inquiry stage.

In general, a title mismatch is a manual stop. Thus the "if the clerk has reason to continue despite the mismatch."

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: NMVTIS AK Rewrite - TC008

Susan,

I've run the inquiry on TC008. The NMVTIS record shows AI000574328 rather than AI000574323 as reported on the "title".

Thank you,

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Hi Siri,

When sending an HC response for an ID class, the restriction codes, as well as the issue, expiration, and class, will only relate to the ID. We do have restriction codes that can affect the ID, such as our Alcohol restriction. So it is entirely possible you will receive a different set of restriction code for an HC with document type 1 (which might have license related restrictions like vision, intra state, etc) than you will for an HC with document type 3.

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Hi Siri,

When sending an HC response for an ID class, the restriction codes, as well as the issue, expiration, and class, will only relate to the ID. We do have restriction codes that can affect the ID, such as our Alcohol restriction. So it is entirely possible you will receive a different set of restriction code for an HC with document type 1 (which might have license related restrictions like vision, intra state, etc) than you will for an HC with document type 3.

Regards,

Mina Peters

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Hi Dillon,

I promised to let you know about test case 30. I changed the wording as below: The VIN should come from the chassis which is first stage and the make and model year from the second stage. The data in the old fields is from first stage.

030	M - 02	A vehicle in your state is re-titled, odometer reading is UNKNOWN. The vehicle has been reconstructed. The VIN is being used from the first stage vehicle and Make/Model Year from the body (second stage). The VIN already exists in NMVTIS with different Make / Mod Yr (Old Veh Info in spreadsheet is from first stage veh).	Title	In-state	Salvage Certificate	AISTRUCTRTST01M02	PONT	2

Sorry for any confusion.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I did mean to put 20170705 in the spreadsheet.

I'm working on the previous jurisdiction issue now.

Thank you,

Hi Dillon,

Did you mean to put 20170705 below instead of 20170605?

The HC had previous jurisdiction as AI but should be blank as this vehicle had not been titled previously.

Thanks,
Susan Creighton / 703.908.5893 office

Document ID: 0.7.1187.57961 DMV00035824

Susan,

I've added the title with the following information:

20170605	SCA666D53HU102664	**HOND**	**2017**	7277387	40183794

The date being yesterday's is somewhat intentional. I forgot to close to close out my drawer from yesterday and open a new one. I'll do that now for any further test cases today. I've also attached my screenshot.

Would you please send me back a copy of your current spreadsheet?

Thank you,

Hi Dillon,

Yes, you were supposed to receive a result from S7 as the test case indicates they used the wrong MCO when they titled. I have performed the correction for S7 so you can proceed.

Thanks,
Susan Creighton / 703.908.5893 office

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Hi Siri,

When sending an HC response for an ID class, the restriction codes, as well as the issue, expiration, and class, will only relate to the ID. We do have restriction codes that can affect the ID, such as our Alcohol restriction. So it is entirely possible you will receive a different set of restriction code for an HC with document type 1 (which might have license related restrictions like vision, intra state, etc) than you will for an HC with document type 3.

Gary,

The AKA DOB is there now but the license issue date is missing now, it was present before.

Thank you

Ok, the status is good now, the 1 little thing I noticed was that there were 3 AKA Names but only 2 AKA DOB (the 3rd AKA DOB is empty). Could you please add that?

Thank you

It was necessary to update this driver with a basic DL expiring the permit. The non-commercial license was set to SUSPEND as a result of the withdrawal.

It was necessary for me to delete and re-add the pointer for Driver B.

Good morning Susan,

I've attached a screenshot showing there are no H1 messages sent by us recently. The only H1 messages we've sent were routing errors during casual testing. We're currently engaged in SPEX structured testing as well, and I believe you share some of the same message type for similar functions, albeit with vastly different parameter definitions.

I'm not really sure how to handle the title active status. In theory we'd be unable to receive an SC by normal means as we're no longer an active state of title. We revert the title for in-state change. The only situation where I could imagine it being relevant is if an another state performs a CSOT on an Alaska record, Alaska performs a CSOT on that same record taking it back, then both states undo their CSOT in reverse.

I apologize, in my haste to turn around your email I forgot the inquiry, requiring more time in the end. Would you like me to run the inquiry, reinstate the CSOT, run the inquiries, undo the CSOT?

Thank you,

Yes, at this point you would contact the state and find out they made a mistake. Please go ahead and send me your screenshots. Once I verify then we will move forward with TC009 where you will need to back out your transaction so they can correct.

Thanks,

Subject: RE: NMVTIS AK Rewrite - TC008

This email comes from an external source, so remember, Think Before You Click!

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've passed the inquiry stage.

In general, a title mismatch is a manual stop. Thus the "if the clerk has reason to continue despite the mismatch."

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

Document ID: 0.7.1187.50576 DMV00035846

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: NMVTIS AK Rewrite - TC009

Hello Susan,

I've completed the CSOT undo for TC009 using the help desk. Please find a screenshot attached.

Also, I incorrectly marked TC010 as T. Your initial H designation is correct.

Thank you,

Yes, at this point you would contact the state and find out they made a mistake. Please go ahead and send me your screenshots. Once I verify then we will move forward with TC009 where you will need to back out your transaction so they can correct.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

This email comes from an external source, so remember, Think Before You Click!

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've passed the inquiry stage.

In general, a title mismatch is a manual stop. Thus the "if the clerk has reason to continue despite the mismatch."

Thank you,

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

Document ID: 0.7.1187.57962 DMV00035854

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

From: Holenarsipura, Subramanya <SHolenarsipura@aamva.org>
Sent: Friday, July 7, 2017 9:27 AM
To: Tancik, Gary (DOA sponsored); Peters, Mina L (DOA)
Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

As part of these test cases in driver B, AI adds another non-CDL pointer with the same DLN as Driver B but with State Doc type as '3', the following is expected
Iff multiple matches are found for a non-CDL pointer, the test cases ensures additional filters are applied and the pointer with a higher rank is retrieved:

CD03.3.2.5 Retrieved Records Validation

7. If both retrieved records are non-CDLIS records:

7.1 If the SOI is a CDLIS Only State, the SOR should follow existing CDLIS guidelines related transmissio non-CDLIS pointers Status information.

7.2 If the SOI is a S2S State, the SOR should apply additional filters. After the application of the filters:

7.2.1 If no matches remain after the additional filters have been applied, the SOR must generate error response (see Error Text for CD03.RTRV.600) in table below.

7.2.2 If only one match remains, the SOR should return the Status information associated with th credential.

CD03 State-to-State Status Request

PEXS Master Specification (AMIE), r6.0.9 AAMVA - Official Use

7.2.3 If multiple matches remain, the SOR should rank the records first on State Document Type the following order: Driver License, Permit for Base Driver License, State Identification Ca Then rank the records based on Real ID Indicator in the following order: Conformant with REAL ID rules, State custom rules. Lastly, rank the records based on the most recent Issua Date. The SOR should then return the Status of the credential with the highest rank order.

For SB/SG message, since we are sending directly to the state and a state can have multiple pointers with the same ST/DLN combination, so they need to rank the records based on the doc type/ real id for that particular st/dln combination

For Inquiry, it will be based on what information is provided on the message(whether State doc type = 1, 2 or 3), depending on that, the appropriate HC message will be sent.

When I sent the SG(test case B4), the DDLCL3 had the value IDD on HG message but the Doc type = 1.

Document ID: 0.7.1187.50575 DMV00035857

So, the above explains what is expected. Please let me know of any questions. Meanwhile, I'll try to send the Inquiry.

Thank you,
Siri.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Gary,

The AKA DOB is there now but the license issue date is missing now, it was present before.

Thank you

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver A

Ready for driver B. The pointer has been created.

7. If both retrieved records are non-CDLIS records:

7.1 If the SOI is a CDLIS Only State, the SOR should follow existing CDLIS guidelines related transmission of non-CDLIS pointers Status information.

7.2 If the SOI is a S2S State, the SOR should apply additional filters. After the application of the filters:

7.2.1 If no matches remain after the additional filters have been applied, the SOR must generate an error response (see Error Text for CD03.RTRV.600) in table below.

7.2.2 If only one match remains, the SOR should return the Status information associated with this credential.

7.2.3 If multiple matches remain, the SOR should rank the records first on State Document Type in the following order: Driver License, Permit for Base Driver License, State Identification Card. Then rank the records based on Real ID Indicator in the following order: Conformant with REAL ID rules, State custom rules. Lastly, rank the records based on the most recent Issuance Date. The SOR should then return the Status of the credential with the highest rank order.

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Hi Dillon,

When I did the re-drive of the SC it should have gone against your titling system anew. It should not have found that title or even that vehicle if you have removed it from your DB. I was expecting to receive the SC back in error with VIN NOT FOUND. Your system has been correctly responding automatically with SC error when the VIN or TITLE IS NOT FOUND on your DB. You are correct that the SC would not be sent to you from another state, but I am forcing it to ensure your database is staying in sync with NMVTIS. So please check your DB to see if that title really got removed.

I apologize about the H1, I was mistakenly looking at the H1 that was sent to you so I have removed that issue.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC009

Good morning Susan,

I've attached a screenshot showing there are no H1 messages sent by us recently. The only H1 messages we've sent were routing errors during casual testing. We're currently engaged in SPEX structured testing as well, and I believe you share some of the same message type for similar functions, albeit with vastly different parameter definitions.

I'm not really sure how to handle the title active status. In theory we'd be unable to receive an SC by normal means as we're no longer an active state of title. We revert the title for in-state change. The only situation where I could imagine it being relevant is if an another state performs a CSOT on an Alaska record, Alaska performs a CSOT on that same record taking it back, then both states undo their CSOT in reverse.

I apologize, in my haste to turn around your email I forgot the inquiry, requiring more time in the end. Would you like me to run the inquiry, reinstate the CSOT, run the inquiries, undo the CSOT?

Thank you,

My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've run the inquiry on TC008. The NMVTIS record shows AI000574328 rather than AI000574323 as reported on the "title".

Thank you,

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Subject: S2S Representative Contact Information

Hello,

My name is Cindy Taber-Lowry and I am a Lead Business Analyst with AAMVA. My primary focus is on State to State. Recently I was asked to compose a list of state representatives who work the State to State issues like potential duplicates, etc. As a result of that I am reaching out to all of you. You represent states that participate in State to State so I wanted to find out the following information:

State to State representatives name (individual who works with State to State on a daily basis)
Representatives Telephone Number
Representatives email address

This information will be shared with all participating State to State representatives so that they can reach out to one another when resolving potential duplicates, fraud, etc. The information will also be posted on the State to State Working Group SharePoint site.

Thank you for your assistance.

Cindy Taber-Lowry
Lead Business Analyst

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

For the Inquiry, whether I send Doc type = 1 or 3, I am receiving HC with DDLCL3 as IDD and Doc type = 1. Is this what you were looking for?

Thank you

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

For the Inquiry, whether I send Doc type = 1 or 3, I am receiving HC with DDLCL3 as IDD and Doc type = 1. Is this what you were looking for?

Thank you

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

We'll See You In Portland Next Week for the Region I Conference

As with every AAMVA conference, the ability to network is one of the most beneficial experiences, and this year's Region I Conference provides many valuable interactive learning opportunities – both with jurisdiction and industry representatives. Jurisdictional attendees can learn about the successes and challenges of others, share ideas, build relationships, and discover the many products and services provided by our industry partners that can assist in your mission. Industry attendees will have the opportunity to meet with key players in the driver's license, motor vehicle and law enforcement arenas. Check out the program on the Region I Conference Web site. If you haven't registered for the event, you can register online today or visit the event registration desk onsite July 9-12, at the Holiday Inn By the Bay in Portland, Maine.

2017 Region II Conference Presentations Are Now Available!

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

We'll See You In Portland Next Week for the Region I Conference

As with every AAMVA conference, the ability to network is one of the most beneficial experiences, and this year's Region I Conference provides many valuable interactive learning opportunities – both with jurisdiction and industry representatives. Jurisdictional attendees can learn about the successes and challenges of others, share ideas, build relationships, and discover the many products and services provided by our industry partners that can assist in your mission. Industry attendees will have the opportunity to meet with key players in the driver's license, motor vehicle and law enforcement arenas. Check out the program on the Region I Conference Web site. If you haven't registered for the event, you can register online today or visit the event registration desk onsite July 9-12, at the Holiday Inn By the Bay in Portland, Maine.

2017 Region II Conference Presentations Are Now Available!

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

We'll See You In Portland Next Week for the Region I Conference

As with every AAMVA conference, the ability to network is one of the most beneficial experiences, and this year's Region I Conference provides many valuable interactive learning opportunities – both with jurisdiction and industry representatives. Jurisdictional attendees can learn about the successes and challenges of others, share ideas, build relationships, and discover the many products and services provided by our industry partners that can assist in your mission. Industry attendees will have the opportunity to meet with key players in the driver's license, motor vehicle and law enforcement arenas. Check out the program on the Region I Conference Web site. If you haven't registered for the event, you can register online today or visit the event registration desk onsite July 9-12, at the Holiday Inn By the Bay in Portland, Maine.

2017 Region II Conference Presentations Are Now Available!

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

We'll See You In Portland Next Week for the Region I Conference

As with every AAMVA conference, the ability to network is one of the most beneficial experiences, and this year's Region I Conference provides many valuable interactive learning opportunities – both with jurisdiction and industry representatives. Jurisdictional attendees can learn about the successes and challenges of others, share ideas, build relationships, and discover the many products and services provided by our industry partners that can assist in your mission. Industry attendees will have the opportunity to meet with key players in the driver's license, motor vehicle and law enforcement arenas. Check out the program on the Region I Conference Web site. If you haven't registered for the event, you can register online today or visit the event registration desk onsite July 9-12, at the Holiday Inn By the Bay in Portland, Maine.

2017 Region II Conference Presentations Are Now Available!

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

We'll See You In Portland Next Week for the Region I Conference

As with every AAMVA conference, the ability to network is one of the most beneficial experiences, and this year's Region I Conference provides many valuable interactive learning opportunities – both with jurisdiction and industry representatives. Jurisdictional attendees can learn about the successes and challenges of others, share ideas, build relationships, and discover the many products and services provided by our industry partners that can assist in your mission. Industry attendees will have the opportunity to meet with key players in the driver's license, motor vehicle and law enforcement arenas. Check out the program on the Region I Conference Web site. If you haven't registered for the event, you can register online today or visit the event registration desk onsite July 9-12, at the Holiday Inn By the Bay in Portland, Maine.

2017 Region II Conference Presentations Are Now Available!

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

As with every AAMVA conference, the ability to network is one of the most beneficial experiences, and this year's Region I Conference provides many valuable interactive learning opportunities – both with jurisdiction and industry representatives. Jurisdictional attendees can learn about the successes and challenges of others, share ideas, build relationships, and discover the many products and services provided by our industry partners that can assist in your mission. Industry attendees will have the opportunity to meet with key players in the driver's license, motor vehicle and law enforcement arenas. Check out the program on the Region I Conference Web site. If you haven't registered for the event, you can register online today or visit the event registration desk onsite July 9-12, at the Holiday Inn By the Bay in Portland, Maine.

2017 Region II Conference Presentations Are Now Available!

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

We'll See You In Portland Next Week for the Region I Conference

As with every AAMVA conference, the ability to network is one of the most beneficial experiences, and this year's Region I Conference provides many valuable interactive learning opportunities – both with jurisdiction and industry representatives. Jurisdictional attendees can learn about the successes and challenges of others, share ideas, build relationships, and discover the many products and services provided by our industry partners that can assist in your mission. Industry attendees will have the opportunity to meet with key players in the driver's license, motor vehicle and law enforcement arenas. Check out the program on the Region I Conference Web site. If you haven't registered for the event, you can register online today or visit the event registration desk onsite July 9-12, at the Holiday Inn By the Bay in Portland, Maine.

2017 Region II Conference Presentations Are Now Available!

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

We'll See You In Portland Next Week for the Region I Conference

As with every AAMVA conference, the ability to network is one of the most beneficial experiences, and this year's Region I Conference provides many valuable interactive learning opportunities – both with jurisdiction and industry representatives. Jurisdictional attendees can learn about the successes and challenges of others, share ideas, build relationships, and discover the many products and services provided by our industry partners that can assist in your mission. Industry attendees will have the opportunity to meet with key players in the driver's license, motor vehicle and law enforcement arenas. Check out the program on the Region I Conference Web site. If you haven't registered for the event, you can register online today or visit the event registration desk onsite July 9-12, at the Holiday Inn By the Bay in Portland, Maine.

2017 Region II Conference Presentations Are Now Available!

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

We'll See You In Portland Next Week for the Region I Conference

As with every AAMVA conference, the ability to network is one of the most beneficial experiences, and this year's Region I Conference provides many valuable interactive learning opportunities – both with jurisdiction and industry representatives. Jurisdictional attendees can learn about the successes and challenges of others, share ideas, build relationships, and discover the many products and services provided by our industry partners that can assist in your mission. Industry attendees will have the opportunity to meet with key players in the driver's license, motor vehicle and law enforcement arenas. Check out the program on the Region I Conference Web site. If you haven't registered for the event, you can register online today or visit the event registration desk onsite July 9-12, at the Holiday Inn By the Bay in Portland, Maine.

2017 Region II Conference Presentations Are Now Available!

The 2017 Annual Region II Conference, hosted by the Tennessee Department of Safety and Homeland Security, was held in Chattanooga last week. There were several sessions held over four days, along with networking opportunities for both jurisdiction and associate members. Speakers from throughout the region covered topics that focused on safety, security, technology and systems, as well as communication and inter-agency collaboration. Our federal partners, sister associations, and associate members also contributed to the session discussions. Visit the Region II Conference Download Center to download presentations from the conference and view conference photos on AAMVA's Flickr Page.

Subject: RE: NMVTIS AK Rewrite - TC009

Howdy Susan,

We're going to make some adjustments that will allow the NMVTIS help desk functions to change the active status of titles as appropriate. In situations where an undo is permanent and that title is truly invalid, the title must be present before the undo will be performed, and the title will then be voided via shredding and removed from the database via a designated function.

I'll let you know as soon as we have these changes made.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

When I did the re-drive of the SC it should have gone against your titling system anew. It should not have found that title or even that vehicle if you have removed it from your DB. I was expecting to receive the SC back in error with VIN NOT FOUND. Your system has been correctly responding automatically with SC error when the VIN or TITLE IS NOT FOUND on your DB. You are correct that the SC would not be sent to you from another state, but I am forcing it to ensure your database is staying in sync with NMVTIS. So please check your DB to see if that title really got removed.

I apologize about the H1, I was mistakenly looking at the H1 that was sent to you so I have removed that issue.

Thanks,
Susan Creighton / 703.908.5893 office

Document ID: 0.7.1187.50530 DMV00036062

Subject: RE: NMVTIS AK Rewrite - TC009

Good morning Susan,

I've attached a screenshot showing there are no H1 messages sent by us recently. The only H1 messages we've sent were routing errors during casual testing. We're currently engaged in SPEX structured testing as well, and I believe you share some of the same message type for similar functions, albeit with vastly different parameter definitions.

I'm not really sure how to handle the title active status. In theory we'd be unable to receive an SC by normal means as we're no longer an active state of title. We revert the title for in-state change. The only situation where I could imagine it being relevant is if an another state performs a CSOT on an Alaska record, Alaska performs a CSOT on that same record taking it back, then both states undo their CSOT in reverse.

I apologize, in my haste to turn around your email I forgot the inquiry, requiring more time in the end. Would you like me to run the inquiry, reinstate the CSOT, run the inquiries, undo the CSOT?

Thank you,

Yes, at this point you would contact the state and find out they made a mistake. Please go ahead and send me your screenshots. Once I verify then we will move forward with TC009 where you will need to back out your transaction so they can correct.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!
My point is that if the clerk has reason to continue despite the mismatch, you should not send a UA unless there is not a record on NMVTIS for that vehicle. Instead you should still send the UT if the record on NMVTIS is for the same vehicle and the SOT is not you or UV if the record on NMVTIS is for the same vehicle and the SOT is you. So in most instances I would imagine that the clerk would not title, but if they do, please follow the process so that invalid duplicates are not created.

I have updated on my side so you can proceed with titling.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

I changed the pointer. After you inquire, let me know and I will change on my side before you send the update.

Please note that in production you should not proceed with sending a UA as that will create a duplicate title in current. The only reason you should send a UA when there is already data on NMVTIS is if you know for sure that the VIN you are entering if for a different vehicle than the record with that same VIN on NMVTIS. Instead you should have the old state correct their information before titling. In this test case we will simulate that a change is made after you sent the inquiry but before you sent the update.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC008

Susan,

If there are records but none matching the supplied state/title, a notification is shown. If the clerk has reason to continue despite the mismatch, it defaults to sending a Title Add (UA) because would result in an error. If I continue titling as is, it will add a new title record. Alternatively, I can use the information on the pointer rather than the spreadsheet (or you can change the pointer) if you're expecting a CSOT (UT).

Hi Dillon,

For this test case please go ahead and title this and just pretend that you got an HC with the correct title number. If you cannot do that I will update our DB to send you the correct title number and then change it before you send the UT. This test suite is to ensure you can back out the title so another state can do a correction and then you re-title. It could be the state needs to correct a history record or the current record. Also, the old state could send an update between the time you do your inquiry and then send your update.

Thanks,
Susan Creighton / 703.908.5893 office

Howdy Susan,

We're going to make some adjustments that will allow the NMVTIS help desk functions to change the active status of titles as appropriate. In situations where an undo is permanent and that title is truly invalid, the title must be present before the undo will be performed, and the title will then be voided via shredding and removed from the database via a designated function.

I'll let you know as soon as we have these changes made.

Thank you,

Hi Dillon,

When I did the re-drive of the SC it should have gone against your titling system anew. It should not have found that title or even that vehicle if you have removed it from your DB. I was expecting to receive the SC back in error with VIN NOT FOUND. Your system has been correctly responding automatically with SC error when the VIN or TITLE IS NOT FOUND on your DB. You are correct that the SC would not be sent to you from another state, but I am forcing it to ensure your database is staying in sync with NMVTIS. So please check your DB to see if that title really got removed.

I apologize about the H1, I was mistakenly looking at the H1 that was sent to you so I have removed that issue.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: NMVTIS AK Rewrite - TC009

Good morning Susan,

I've attached a screenshot showing there are no H1 messages sent by us recently. The only H1 messages we've sent were routing errors during casual testing. We're currently engaged in SPEX structured testing as well, and I believe you share some of the same message type for similar functions, albeit with vastly different parameter definitions.

I'm not really sure how to handle the title active status. In theory we'd be unable to receive an SC by normal means as we're no longer an active state of title. We revert the title for in-state change. The only situation where I could imagine it being relevant is if an another state performs a CSOT on an Alaska record, Alaska performs a CSOT on that same record taking it back, then both states undo their CSOT in reverse.

I apologize, in my haste to turn around your email I forgot the inquiry, requiring more time in the end. Would you like me to run the inquiry, reinstate the CSOT, run the inquiries, undo the CSOT?

Thank you,

Hi Dillon,

For TC009 there was no inquiry prior to the UNDO and when I re-drove the SC I see that the title is still active on your DB. Also you sent an H1 which I thought you did not have more than one occurrence of lienholder information.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: S2S Representative Contact Information

Hello,

My name is Cindy Taber-Lowry and I am a Lead Business Analyst with AAMVA. My primary focus is on State to State. Recently I was asked to compose a list of state representatives who work the State to State issues like potential

Document ID: 0.7.1187.91324 DMV00036100

duplicates, etc. As a result of that I am reaching out to all of you. You represent states that participate in State to State so I wanted to find out the following information:

State to State representatives name (individual who works with State to State on a daily basis)
Representatives Telephone Number
Representatives email address

This information will be shared with all participating State to State representatives so that they can reach out to one another when resolving potential duplicates, fraud, etc. The information will also be posted on the State to State Working Group SharePoint site.

Thank you for your assistance.

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the "highest-level classification " as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: "'A', 'B', 'C', 'AM', 'BM' or 'CM'", correct?

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks
Gary

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Yes, this depicts the fundamental problem. Your previous email with the ranking descriptions makes sense.

To clarify, parameter DDLCL3 should represent only one non-commercial class correlating with the doc type. So for SB/SG you would only expect D since it outranks the ID.

But for DDLCL2 (commercial class), it is a group field and would identify the “highest-level classification ” as well as a potential motorcycle oriented class. So you would only anticipate seeing these possibilities: “'A', 'B', 'C', 'AM', 'BM' or 'CM'”, correct?

Thanks

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver B

Siri

This I believe is an area with multiple problems. Effectively the response is reflecting the latest license class, in this case the recently added ID. For instance, the license issue and expiration date are for the ID and not the DL. Can you verify parameter DDLCL3 correctly reflects the D and ID non-commercial classes?

Since this fix may be significant, I would also like to address anticipated problems with inquiry verification. Can you confirm an SC could be sent specifically for doc type 1 or doc type 3 resulting in HC with info exclusive to the class? For instance, an inquiry for doc type 3 resulting in the ID issue/expire date?

If possible, could you go off-script and attempt these inquiries to assess the scope of this problem?

Thanks

Gary

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver C

Asma, can you clarify the set up for tests C2 and C3?

Is the U10 conviction expected to be linked to the D45 withdrawal?

Also, the set up instructions for Driver C depicts an accident and a conviction with linked withdrawal. Are those expected to be set up on P3 or should they be in AI, ie: using the U10 and D45?

Thanks
Gary

Gary,

#C2 is AI sending the ROOSC for ACD Code 'U10' on Driver C and # C3, AI is reporting the Withdrawal for ACD Code D45.

#C2 and # C3 are separate transactions and they are not linked.

As far as your question on Accident, Conviction and Withdrawal linkages, this setup is done by SOR (P3) and you will be receiving it as part of the State to State History request and CSOR responses, you don't have do anything.

Hope I answered your question.

Thanks,
Asma

Gary,

Asma is in a meeting and will start once she is back. Meanwhile, pointer for Driver C has been added, ready for C1.

Thank you,
Siri.

Good afternoon,

The Alaska DMV will be ready for a group CSTIMS startup call near the end of June. How does Tuesday 06/27 or Wed 06/28 around 9:00a.m. or 10:00a.m. Alaska time work?

Sincerely,

Nichole Tham

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver C

Thanks.

I will need to have U10 configured as an Alaska conviction type. There will be short delay.

Also, I have a meeting at 3:00pm your time (11:00 AK). Do you have similar hours as Siri? We typically test between 10am through 3:30pm, which is when Siri's day ends.

Gary,

#C2 is AI sending the ROOSC for ACD Code 'U10' on Driver C and # C3, AI is reporting the Withdrawal for ACD Code D45.

#C2 and # C3 are separate transactions and they are not linked.

As far as your question on Accident, Conviction and Withdrawal linkages, this setup is done by SOR (P3) and you will be receiving it as part of the State to State History request and CSOR responses, you don't have do anything.

Hope I answered your question.

Thanks,
Asma

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver C

Asma, can you clarify the set up for tests C2 and C3?

Is the U10 conviction expected to be linked to the D45 withdrawal?

Also, the set up instructions for Driver C depicts an accident and a conviction with linked withdrawal. Are those expected to be set up on P3 or should they be in AI, ie: using the U10 and D45?

Thanks

Gary

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver C

Asma, can you clarify the set up for tests C2 and C3?

Is the U10 conviction expected to be linked to the D45 withdrawal?

Also, the set up instructions for Driver C depicts an accident and a conviction with linked withdrawal. Are those expected to be set up on P3 or should they be in AI, ie: using the U10 and D45?

Thanks
Gary

Gary,

Asma is in a meeting and will start once she is back. Meanwhile, pointer for Driver C has been added, ready for C1.

Thank you,
Siri.

Thanks.

I will need to have U10 configured as an Alaska conviction type. There will be short delay.

Also, I have a meeting at 3:00pm your time (11:00 AK). Do you have similar hours as Siri? We typically test between 10am through 3:30pm, which is when Siri's day ends.

Gary,

#C2 is AI sending the ROOSC for ACD Code 'U10' on Driver C and # C3, AI is reporting the Withdrawal for ACD Code D45.

#C2 and # C3 are separate transactions and they are not linked.

As far as your question on Accident, Conviction and Withdrawal linkages, this setup is done by SOR (P3) and you will be receiving it as part of the State to State History request and CSOR responses, you don't have do anything.

Hope I answered your question.

Thanks,
Asma

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver C

Asma, can you clarify the set up for tests C2 and C3?

Is the U10 conviction expected to be linked to the D45 withdrawal?

Also, the set up instructions for Driver C depicts an accident and a conviction with linked withdrawal. Are those expected to be set up on P3 or should they be in AI, ie: using the U10 and D45?

Thanks
Gary

Thanks.

I will need to have U10 configured as an Alaska conviction type. There will be short delay.

Also, I have a meeting at 3:00pm your time (11:00 AK). Do you have similar hours as Siri? We typically test between 10am through 3:30pm, which is when Siri's day ends.

Gary,

#C2 is AI sending the ROOSC for ACD Code 'U10' on Driver C and # C3, AI is reporting the Withdrawal for ACD Code D45.

#C2 and # C3 are separate transactions and they are not linked.

As far as your question on Accident, Conviction and Withdrawal linkages, this setup is done by SOR (P3) and you will be receiving it as part of the State to State History request and CSOR responses, you don't have do anything.

Hope I answered your question.

Thanks,
Asma

It wasn't clear to me that the D45 withdrawal assumed there was an underlying conviction. I will need to create the D45 conviction first, which means you may receive ROOSC before I send the NOOSC.

Is that ok?

Hi Gary,

My working hours are 8:30 AM (ET) to 4:00 PM (ET) .

Please send # C2 when you are ready.

Sure, we can continue with the testing once you are back from your meeting.

Thanks,
Asma Syeda, CSM

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver C

Thanks.

I will need to have U10 configured as an Alaska conviction type. There will be short delay.

Also, I have a meeting at 3:00pm your time (11:00 AK). Do you have similar hours as Siri? We typically test between 10am through 3:30pm, which is when Siri's day ends.

Gary,

#C2 is AI sending the ROOSC for ACD Code 'U10' on Driver C and # C3, AI is reporting the Withdrawal for ACD Code D45.

#C2 and # C3 are separate transactions and they are not linked.

As far as your question on Accident, Conviction and Withdrawal linkages, this setup is done by SOR (P3) and you will be receiving it as part of the State to State History request and CSOR responses, you don't have do anything.

Hope I answered your question.

Thanks,
Asma

Subject: RE: SPEXS 6.0 Baseline - Structured test plan - Driver C

Asma, can you clarify the set up for tests C2 and C3?

Is the U10 conviction expected to be linked to the D45 withdrawal?

Also, the set up instructions for Driver C depicts an accident and a conviction with linked withdrawal. Are those expected to be set up on P3 or should they be in AI, ie: using the U10 and D45?

Thanks
Gary
